1 The MSCI ACWI Small Cap Index is designed to measure the equity market performance of small-cap companies across developed and emerging markets globally.

2 Morningstar Global Small/Mid Stock portfolios invest in a variety of international stocks that are smaller. World-stock portfolios have few geographical limitations. It is common for these portfolios to invest the majority of their assets in developed markets, with the remainder divided among the globe's smaller markets. These portfolios are not significantly overweight U.S. equity exposure relative to the Morningstar Global Market Index and maintain at least a 20% absolute U.S. exposure.

3 Holdings are released based on a 60-day lag from the most recent quarter end according to the Grandeur Peak Holdings Release Policy. Portfolio holdings are subject to change at any time. References to specific securities should not be construed as recommendations by the Fund or its Advisor. Current and future holdings are subject to risk. Total amount subject to rounding.
