each a series of Grandeur Peak Global Trust

STATEMENT OF ADDITIONAL INFORMATION

October 20, 2023

This Statement of Additional Information (“SAI”) is not a Prospectus and should be read in conjunction with the Prospectus of Investor Class Shares and Institutional Class Shares (collectively, the “Shares”) of the funds listed above (each a “Fund,” and together, the “Funds”), each of which is a separate series of Grandeur Peak Global Trust, a Delaware statutory trust (the “Trust”) dated October 20, 2023, which is incorporated by reference into this SAI (i.e., legally made a part of this SAI). Copies may be obtained without charge by contacting the Funds’ Transfer Agent, Ultimus Fund Solutions, LLC, 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246 or by calling 855-377-PEAK (7325). You may also obtain a prospectus by visiting the Funds’ website at <http://www.grandeurpeakglobal.com>.

THE FUNDS

This SAI includes information about ten series of Grandeur Peak Global Trust, a Delaware statutory trust organized on January 9, 2023 (the “Trust”). The Trust is registered as an open-end management investment company. The Trust is governed by its Board of Trustees (the “Board”).

The Funds will acquire all of the assets and liabilities of Grandeur Peak Emerging Markets Opportunities Fund, Grandeur Peak Global Contrarian Fund, Grandeur Peak Global Micro Cap Fund, Grandeur Peak Global Opportunities Fund, Grandeur Peak Global Reach Fund, Grandeur Peak Global Stalwarts Fund, Grandeur Peak International Opportunities Fund, Grandeur Peak International Stalwarts Fund, Grandeur Peak US Stalwarts Fund, and Grandeur Peak Global Explorer Fund, each a series of Financial Investors Trust (the “Predecessor Funds”), in a tax-free reorganization on October 20, 2023 (the “Reorganization”). Each of the Predecessor Funds had the same investment objectives, strategies and policies as the corresponding Fund at the time of the Reorganization.

Each Fund is advised by Grandeur Peak Global Advisors, LLC, (the “Adviser”). Grandeur Peak Global Advisors, LLC was also the investment adviser to the Predecessor Funds.

The Investment Company Act of 1940, as amended (the “1940 Act”), classifies mutual funds as either diversified or non-diversified. Each Fund, except the Grandeur Peak Global Explorer Fund, is classified as diversified. The Grandeur Peak Global Explorer Fund is classified as non-diversified.

Under the Trust’s Agreement and Declaration of Trust, each Trustee will continue in office until the termination of the Trust or his/her earlier death, incapacity, resignation or removal. Shareholders can remove a Trustee to the extent provided by the Investment Company Act of 1940, as amended (the “1940 Act”) and the rules and regulations promulgated thereunder. Vacancies may be filled by a majority of the remaining Trustees, except insofar as the 1940 Act may require the election by shareholders. As a result, normally no annual or regular meetings of shareholders will be held unless matters arise requiring a vote of shareholders under the Agreement and Declaration of Trust or the 1940 Act.

INVESTMENTS AND RISKS

Each Fund seeks long-term growth of capital. While there is no assurance that a Fund will achieve its investment objective, it endeavors to do so by following the strategies and policies described in the Prospectus.

The investment objective of the Funds and the descriptions of the Funds’ principal investment strategies are set forth under “Principal Investment Strategies” in the Prospectus. Each Fund’s investment objective is not fundamental and may be changed without the approval of a majority of the outstanding voting securities of the Trust.

The following pages contain more detailed information about the types of instruments in which the Funds may invest, strategies the Adviser may employ in pursuit of the Funds’ investment objective and a summary of related risks.

Borrowing to Purchase Securities (Leveraging). The Funds may use leverage, that is, borrow money to purchase securities. Leverage increases both investment opportunity and investment risk. If the investment gains on securities purchased with borrowed money exceed the borrowing costs

(including interest), the net asset value of a Fund will rise. On the other hand, if the investment gains fail to cover the borrowing costs or if there are losses, the net asset value of a Fund will decrease.

The 1940 Act requires borrowings to have 300% net asset coverage, which means, in effect, that each Fund would be permitted to borrow up to an amount equal to one-third of the value of its total assets. If a Fund fails to meet this asset coverage test for any reason including adverse market conditions, it will be required to reduce borrowings within three business days to the extent necessary to meet the test. This requirement may make it necessary to sell a portion of a Fund's securities at a time when it is disadvantageous to do so. The amount a Fund can borrow may also be limited by applicable margin limitations of the Federal Reserve Board. Briefly, these provide that banks subject to the Federal Reserve Act may not make loans for the purpose of buying or carrying margin stocks if the loan is secured directly or indirectly by a margin stock, to the extent that the loan is greater than the maximum loan value of the collateral securing the loan.

Despite the potential risks of leveraging, the Adviser believes there may be times when it may be advantageous to the Funds to borrow to make investments. For example, when a portfolio manager perceives unusual opportunities in the market or in a particular sector, the portfolio manager may want to be more than 100% invested. Borrowing may also be considered when stock prices and trading volume are not favorable for securities a portfolio manager wants to sell, but stock prices and trading volume are favorable for securities the portfolio manager wants to buy. In these situations, which arise infrequently, borrowing may allow a portfolio manager to take advantage of favorable opportunities to purchase desired securities without having to sell securities at unfavorable prices.

Convertible Securities. The Funds may invest in convertible securities. These are generally bonds or preferred stocks that are convertible into a corporation's common stock. Convertible securities entitle the holder to receive interest paid or accrued on debt or the dividend paid on preferred stock until the convertible securities mature or are redeemed, converted or exchanged. Prior to conversion, convertible securities have characteristics similar to ordinary debt securities or preferred stocks in that they normally provide a stable stream of income with generally higher yields than those of common stock of the same or similar issuers. Convertible securities rank senior to common stock in a corporation's capital structure and therefore generally entail less risk of loss of principal than the corporation's common stock.

In selecting convertible securities for the Funds, the Adviser will consider, among other factors: its evaluation of the creditworthiness of the issuers of the securities; the interest or dividend income generated by the securities; the potential for capital appreciation of the securities and the underlying common stocks; the prices of the securities relative to other comparable securities and to the underlying common stocks; whether the securities are entitled to the benefits of sinking funds or other protective conditions; diversification of a Fund's portfolio as to issuers; and whether the securities are rated by a rating agency and, if so, the ratings assigned.

The value of convertible securities is a function of their investment value (determined by yield in comparison with the yields of other securities of comparable maturity and quality that do not have a conversion privilege) and their conversion value (their worth, at market value, if converted into the underlying common stock). The investment value of convertible securities is influenced by changes in interest rates, with investment value declining as interest rates increase and increasing as interest rates decline, and by the credit standing of the issuer and other factors. The conversion value of convertible securities is determined by the market price of the underlying common stock. If the conversion value is low relative to the investment value, the price of the convertible securities is governed principally by their investment value. To the extent the market price of the underlying common stock approaches or exceeds the conversion price, the price of the convertible securities will be increasingly influenced by their conversion value. In addition, convertible securities generally sell at a premium over their conversion value determined by the extent to which investors place value on the right to acquire the

underlying common stock while holding fixed income securities.

Capital appreciation for a Fund may result from an improvement in the credit standing of an issuer whose securities are held in the Fund or from a general lowering of interest rates, or a combination of both. Conversely, a reduction in the credit standing of an issuer whose securities are held by a Fund or a general increase in interest rates may be expected to result in capital depreciation to the Fund. Convertible securities may have mandatory sinking fund provisions prior to maturity, a negative feature when interest rates decline.

Refer to [Appendix A](#) for a description of preferred stock and long- and short-term debt ratings.

Corporate Bonds. The Funds may invest in corporate bonds that are rated, at the time of purchase, in the four highest categories by Moody's Investors Service, Inc. ("Moody's"), Standard & Poor's Ratings Service, Inc., a division of McGraw-Hill Companies, Inc. ("S&P") or other nationally recognized rating agencies or unrated securities deemed by the Adviser to be of comparable quality. The Funds may also invest in corporate bonds that are lower rated (Moody's Ba or lower or S&P BB or lower). These lower rated bonds are also known as "non-investment grade debt securities" or "junk bonds." See [Appendix A](#) for a description of ratings on investment grade and non-investment grade debt securities.

Derivatives. The Funds may use derivatives, such as futures, options, options on futures, and forward foreign currency exchange contracts. A derivative is a financial contract whose value is based on (or "derived from") a traditional security (such as a stock or bond), an asset (such as a commodity like gold), or a market index (such as the S&P 500). A derivative contract will obligate or entitle a Fund to deliver or receive an asset or cash payment based on the change in one or more securities, currencies, indices or other assets. The Funds may use derivatives for hedging purposes, including to attempt to protect against possible changes in the market value of securities held or to be purchased for a Fund's portfolio resulting from securities markets, currency exchange rate or interest rate fluctuations (*i.e.*, to hedge); protect the Fund's unrealized gains reflected in the value of its portfolio securities; facilitate the sale of such securities for investment purposes; and as a substitute for buying or selling securities, securities indices or currencies. The Funds may also use derivatives for non-hedging (speculative) purposes including to enhance a Fund's returns. A Fund may use any or all of these investment techniques and different types of derivative securities may be purchased at any time and in any combination. There is no particular strategy that dictates the use of one technique rather than another, as use of derivatives is a function of numerous variables, including market conditions.

The use of derivatives presents risks different from, and possibly greater than, the risks associated with investing directly in traditional securities. Among the risks presented are market risk, credit risk, management risk and liquidity risk. The primary risk with many derivatives is that they can amplify a gain or loss, potentially earning or losing substantially more money than the actual cost of the derivative instrument. These risks are heightened when the management team uses derivatives to enhance the Fund's return or as a substitute for a position or security, rather than solely to hedge (or offset) the risk of a position or security held by the Fund. In addition, certain derivatives have the potential for unlimited losses regardless of the size of the initial investment. Derivatives also involve the risk of mispricing or improper valuations (particularly, for non-standardized contracts) and the risk that changes in the value of the derivative may not correlate perfectly with the relevant assets, rates and indices. Derivatives may also be less liquid and may be difficult or impossible to sell or terminate at a desirable time or price. Derivatives may also involve credit risk which is the risk that a loss may be sustained as a result of the failure of a counterparty to comply with the terms of a derivative instrument. The counterparty risk for exchange-traded derivatives is generally less than for privately-negotiated or over-the-counter ("OTC") derivatives, since generally a clearing agency, which is the issuer or counterparty to each exchange-traded instrument, provides a guarantee of performance. For privately-negotiated instruments, there is no similar clearing agency guarantee. Use of derivatives may also increase the amount and affect the timing and character of taxes payable by shareholders. The Fund may lose money on derivatives or may not fully benefit on derivatives if changes in their value do not correspond accurately to changes

in the value of the Fund's holdings. A Fund's ability to benefit from derivatives is largely dependent on the Adviser's ability to use such strategies successfully.

Rule 4.5 under the Commodity Exchange Act ("CEA"), as amended, exempts an adviser of a fund that invests in "commodity interests" from registration as a "commodity pool operator" ("CPO") provided that, among other restrictions, the adviser enters into such positions solely for "bona fide hedging purposes" or limits its use of commodity interests for non-bona fide hedging purposes such that (i) the aggregate initial margin and premiums required to establish non-bona fide hedging positions do not exceed 5% of the liquidation value of the fund's portfolio, or (ii) the aggregate "notional value" of the non-bona fide hedging commodity interests do not exceed 100% of the liquidation value of the fund's portfolio.

The Adviser intends to: (i) comply with the requirements of the CEA by operating each Fund in a manner consistent with the restrictions of Rule 4.5, including filing a notice of eligibility of exemption from registration in accordance with applicable procedures and deadlines; (ii) comply with the requirements of the CEA by registering as a CPO with the CFTC and the National Futures Association; or (iii) operate each Fund in a manner such that the Fund will not be a "commodity pool" under the CEA.

For more information about the various types of derivatives, see the sections in this SAI discussing such securities including Futures Contracts; Put and Call Options and Options and Futures Relating to Foreign Currencies.

Futures Contracts. The Funds may enter into futures contracts. Futures contracts are standardized, exchange-traded contracts that require delivery of the underlying financial instrument (such as a bond, currency or stock index) at a specified price, on a specified future date. The buyer of the futures contract agrees to buy the underlying financial instruments from the seller at a fixed purchase price upon the expiration of the contract. The seller of the futures contract agrees to sell the underlying financial instrument to the buyer at expiration at the fixed sales price. In most cases, delivery never takes place. Instead, both the buyer and the seller, acting independently of each other, usually liquidate their long and short positions before the contract expires; the buyer sells futures and the seller buys futures.

The value of a futures contract tends to increase and decrease in tandem with the value of its underlying instrument. Therefore, purchasing futures contracts will tend to increase a Fund's exposure to positive and negative price fluctuations in the underlying instrument, much as if it had purchased the underlying instrument directly. When a Fund sells a futures contract, by contrast, the value of its futures position will tend to move in a direction contrary to the market. Selling futures contracts, therefore, will tend to offset both positive and negative market price changes, much as if the underlying instrument had been sold.

Futures may be used for hedging (*i.e.*, to protect against adverse future price movements in a Fund's portfolio securities, or in securities a Fund intends to purchase). For example, if the portfolio manager thinks that the stock market might decline, the portfolio manager could sell stock index futures to safeguard a Fund's portfolio. If the market declines as anticipated, the value of stocks in a Fund's portfolio would decrease, but the value of a Fund's futures contracts would increase. The Funds may also use futures contracts to speculate on the market. For example, the portfolio manager might buy stock index futures on the expectation that the value of a particular index will rise, even though the stocks comprising the index are unrelated to stocks held or intended to be purchased by a Fund. Using futures for speculation, however, involves significant risk since futures contracts are highly leveraged instruments. When a portfolio manager enters into a futures contract, the manager needs to put up only a small fraction of the value of the underlying contract as collateral, yet gains or losses will be based on the full value of the contract.

The use of futures contracts would expose the Funds to additional investment risks and transaction costs. Risks include: the risk that securities prices will not move in the direction that the Adviser anticipates; an imperfect correlation between the price of the futures contract and movements in the prices of any securities being hedged; the possible absence of a liquid secondary market for any

particular futures contract and possible exchange-imposed price fluctuation limits; and leverage risk, which is the risk that adverse price movements in a futures contract can result in a loss substantially greater than a Fund's initial investment in that contract. A relatively small price movement in a futures contract may result in an immediate and substantial loss (or gain) to the Fund.

The Funds may enter into futures contracts and related options as permitted under CFTC Rules. The Adviser expects that the Funds' futures transactions will generally include transactions: (i) on domestic and foreign exchanges on currencies, interest rates and bond indices; and (ii) on domestic and, to the extent permitted by the CFTC, foreign exchanges on stock indices. The Adviser intends to (i) comply with the requirements of the CEA by operating the Funds in a manner consistent with the restrictions of Rule 4.5, including filing a notice of eligibility of exemption from registration in accordance with applicable procedures and deadlines; (ii) comply with the requirements of the CEA by registering as a CPO with the CFTC and the National Futures Association; or (iii) operate the Funds in a manner such that neither Fund will be a "commodity pool" under the CEA. CFTC regulations governing the use of commodity interests, including certain futures contracts, by investment companies such as the Funds may be subject to amendment. Amendments to such regulations by the CFTC may affect the ability of the Funds to use futures and commodity interests, and could affect the Funds' ability to achieve its investment objective.

Futures Margin Payments. The purchaser or seller of a futures contract is not required to deliver or pay for the underlying instrument unless the contract is held until the delivery date. However, both the purchaser and seller are required to deposit "initial margin" with a futures broker, known as a futures commission merchant (FCM), when the contract (or written options thereon) is entered into. Initial margin deposits are typically equal to a percentage of the contract's value. If the value of either party's position declines, that party will be required to make additional "variation margin" payments to settle the change in value on a daily basis. The party that has a gain may be entitled to receive all or a portion of this amount. Initial and variation margin payments do not constitute purchasing securities on margin for purposes of the investment limitations of the Funds. In the event of the bankruptcy of an FCM that holds margin on behalf of a Fund, the Fund may be entitled to a return of the margin owed only in proportion to the amount received by the FCM's other customers, potentially resulting in losses to the respective Fund. Because of the low margin deposits required, futures trading involves an extremely high degree of leverage. As a result, a relatively small price movement in a futures contract may result in a substantial loss as well as a gain, to an investor.

Options and Futures Relating to Foreign Currencies. The Funds may engage in options and futures transactions related to foreign currencies. Currency futures contracts are similar to forward currency exchange contracts, except that they are traded on exchanges (and have margin requirements) and are standardized as to contract size and delivery date. Most currency futures contracts call for payment or delivery in U.S. dollars. The underlying instrument of a currency option may be a foreign currency, which generally is purchased or delivered in exchange for U.S. dollars, or may be a futures contract. The purchaser of a currency call obtains the right to purchase the underlying currency. The purchaser of a currency put obtains the right to sell the underlying currency.

The uses and risks of currency options and futures are similar to options and futures relating to securities or indexes, as discussed above. The Funds may purchase and sell currency futures and may purchase and write currency options to increase or decrease exposure to different foreign currencies. The Funds may also purchase and write currency options in conjunction with each other or with currency futures or forward contracts. Currency futures and options values can be expected to correlate with exchange rates, but may not reflect other factors that affect the value of the Funds' investments. A currency hedge, for example, should protect a yen-denominated security from a decline in the yen, but will not protect the Funds against a price decline resulting from deterioration in the issuer's creditworthiness. Because the value of the Funds' foreign-denominated investments changes in response to many factors other than exchange rates, it may not be possible to match the amount of

currency options and futures to the value of the Funds' investments exactly over time.

Asset Coverage for Futures and Options Positions. As investment companies registered with the SEC, the Funds must "set aside" (often referred to as "asset segregation") liquid assets, or engage in other SEC- or staff-approved measures to "cover" open positions with respect to certain kinds of derivative instruments (including swaps, options, futures and forward contracts). In the case of derivative contracts that do not cash settle, for example, a Fund will typically set aside liquid assets equal to the full notional value of the derivative contracts while the positions are open. With respect to derivative contracts that do cash settle, however, a Fund may set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligations (i.e., the Fund's daily net liability) under the derivative contracts, if any, rather than their full notional value. Each Fund reserves the right to modify its asset segregation policies in the future to, among other things, comply with any changes in the positions from time to time articulated by the SEC or its staff regarding asset segregation. By setting aside assets equal to only its net obligations under cash-settled derivative contracts, a Fund will have the ability to employ leverage to a greater extent than if the Fund were required to segregate assets equal to the full notional amount of the derivative contracts.

Limitations on Futures and Commodity Options Transactions. The Funds' investments in futures contracts and commodity options, as well as such Funds' policies regarding futures contracts and options, are subject to CFTC rules discussed elsewhere in this SAI, and may be changed as regulatory agencies permit.

Put and Call Options. The Funds may purchase and write put and call options. Such options may relate to particular securities, indices or futures contracts, may or may not be listed on a domestic or non-U.S. securities exchange and may or may not be issued by the Options Clearing Corporation. A put option gives the purchaser the right to sell a security or other instrument to the writer of the option at a stated price during the term of the option. A call option gives the purchaser the right to purchase a security or other instrument from the writer of the option at a stated price during the term of the option. The Funds may use put and call options for a variety of purposes. For example, if the portfolio manager wishes to hedge a security owned by a Fund against a decline in price, the portfolio manager may purchase a put option on the underlying security; i.e., purchase the right to sell the security to a third party at a stated price. If the underlying security then declines in price, the portfolio manager can exercise the put option, thus limiting the amount of loss resulting from the decline in price. Similarly, if the portfolio manager intends to purchase a security at some date in the future, the portfolio manager may purchase a call option on the security today in order to hedge against an increase in its price before the intended purchase date. Put and call options also can be used for speculative purposes for the Funds. For example, if a portfolio manager believes that the price of stocks generally is going to rise, the manager may purchase a call option on a stock index, the components of which are unrelated to the stocks held or intended to be purchased.

Purchasing Put and Call Options. The Funds may purchase put and call options. By purchasing a put option, a Fund obtains the right (but not the obligation) to sell the option's underlying instrument at a fixed strike price. In return for this right, the Fund pays the current market price for the option (known as the option premium). Options have various types of underlying instruments, including specific securities, indexes of securities prices and futures contracts. A Fund may terminate its position in a put option it has purchased by allowing it to expire, by exercising the option or if able, by selling the option. If the option is allowed to expire, the Fund will lose the entire premium it paid. If the Fund exercises the option, it completes the sale of the underlying instrument at the strike price. A Fund may also terminate a put option position by closing it out in the secondary market at its current price, if a liquid secondary market exists.

The buyer of a typical put option can expect to realize a gain if a security's price falls substantially. However, if the underlying instrument's price does not fall enough to offset the cost of purchasing the option, a put buyer can expect to suffer a loss (limited to the amount of the premium paid, plus related

transaction costs).

The features of call options are essentially the same as those of put options, except that the purchaser of a call option obtains the right to purchase, rather than sell, the underlying instrument at the option's strike price. A call buyer typically attempts to participate in potential price increases of the underlying instrument with risk limited to the cost of the option if the security's price falls. At the same time, the buyer can expect to suffer a loss if the security's price does not rise sufficiently to offset the cost of the option.

Each Fund will not invest more than 10% of the value of its net assets in purchased options.

Writing Put and Call Options. The Funds may write (*i.e.*, sell) put and call options. When a Fund writes a put option, it takes the opposite side of the transaction from the option's purchaser. In return for receipt of the premium, the Fund assumes the obligation to pay the strike price for the option's underlying instrument if the other party to the option chooses to exercise it. When writing an option on a futures contract the Fund would be required to make margin payments to an FCM as described above for futures contracts. The Fund may seek to terminate its position in put options it writes before exercise by closing out the option in the secondary market at its current price. If the secondary market is not liquid for put options the Fund has written, however, the Fund must continue to be prepared to pay the strike price while the option is outstanding, regardless of price changes, and must continue to set aside assets to cover its position. If the underlying security's price rises, however, a put writer would generally expect to profit, although its gain would be limited to the amount of the premium it received.

If the security's price remains the same over time, it is likely that the put writer will also profit, because it should be able to close out the option at a lower price. If the security's price falls, the put writer would expect to suffer a loss. This loss should be less than the loss from purchasing the underlying instrument directly, however, because the premium received for writing the option should mitigate the effects of the decline.

Writing a call option obligates a Fund to sell or deliver the option's underlying instrument, in return for the strike price, upon exercise of the option. The characteristics of writing call options are similar to those of writing put options, except that writing calls generally is a profitable strategy if prices remain the same or fall. Through receipt of the option premium, a call writer mitigates the effects of a price decline. At the same time, because a call writer must be prepared to deliver the underlying instrument in return for the strike price, even if its current value is greater, a call writer gives up some ability to participate in the security's price increase.

The Funds will write only "covered" put and call options.

A call option written by a Fund is "covered" if the Fund: (a) owns the underlying security covered by the call or has an absolute and immediate right to acquire that security without additional cash consideration upon conversion or exchange of other securities held in its portfolio; or (b) meets the asset coverage requirements described under "Asset Coverage for Futures and Options Positions" above.

A put option written by a Fund is "covered" if the Fund: (a) holds a put on the same security having the same principal amount as the put option it has written and the exercise price of the put held is equal to or greater than the exercise price of the put written; or (b) meets the asset coverage requirements described under "Asset Coverage for Futures and Options Positions" above.

If options are "covered" by the Fund meeting the asset coverage requirements, the Fund's economic exposure is not limited as it would be if the options are "covered" as described in paragraphs (a) above.

OTC Options. The Funds may engage in over-the-counter ("OTC") options transactions. Unlike exchange-traded options, which are standardized with respect to the underlying instrument, expiration date, contract size, and strike price, the terms of OTC options (options not traded on exchanges) generally are established through negotiation with the other party to the option contract. While this type

of arrangement allows a Fund greater flexibility to tailor options to its needs, OTC options generally involve greater credit and default risk than exchange-traded options, which are guaranteed by the clearing organization of the exchanges where they are traded.

Additional Risks of Options and Futures Contracts.

Market Risk. Market risk is the risk that the value of the underlying assets may go up or down. Adverse movements in the value of an underlying asset can expose the Fund to losses. Market risk is the primary risk associated with derivative transactions, such as futures and options. Derivative instruments may include elements of leverage and, accordingly, fluctuations in the value of the derivative instrument in relation to the underlying asset may be magnified. The successful use of futures and options depends upon a variety of factors, particularly the portfolio manager's ability to predict movements of the securities, currencies and commodities markets, which may require different skills than predicting changes in the prices of individual securities. There can be no assurance that any particular strategy adopted will succeed.

Credit Risk. Credit risk is the risk that a loss may be sustained as a result of the failure of a counterparty to comply with the terms of a derivative instrument. The counterparty risk for exchange-traded derivatives is generally less than for privately-negotiated or OTC derivatives, since generally a clearing agency, which is the issuer or counterparty to each exchange-traded instrument, provides a guarantee of performance. For privately-negotiated instruments, there is no similar clearing agency guarantee. In all transactions, the Fund will bear the risk that the counterparty will default, and this could result in a loss of the expected benefit of the derivative transactions and possibly other losses to the Fund.

Lack of Correlation of Price Changes. Because there are a limited number of types of exchange-traded options and futures contracts, it is likely that the standardized contracts available will not match a Fund's current or anticipated investments exactly. The Funds may invest in options and futures contracts based on securities with different issuers, maturities, or other characteristics from the securities in which they typically invest, which involve a risk that the respective Fund's options or futures positions will not track the performance of the Fund's other investments.

Options and futures prices can also diverge from the prices of their underlying instruments, even if the underlying instruments match the Fund's investments well. Options and futures prices are affected by such factors as current and anticipated short-term interest rates, changes in volatility of the underlying instrument, and the time remaining until expiration of the contract, which may not affect a security's price the same way. Imperfect correlation may also result from differing levels of demand in the options and futures markets and the securities markets, from structural differences in how options, futures and securities are traded, or from imposition of daily price fluctuation limits or trading halts. The Funds may purchase or sell options and futures contracts with a greater or lesser value than the securities they wish to hedge or intend to purchase in order to attempt to compensate for differences in volatility between the contract and the securities, although this may not be successful in all cases. If price changes in a Fund's options or futures positions are poorly correlated with other investments, the positions may fail to produce anticipated gains or result in losses that are not offset by gains in other investments.

Liquidity of Options and Futures Contracts. There is no assurance that a liquid secondary market will exist for any particular option or futures contract at any particular time. Options may have relatively low trading volume and liquidity if their strike prices are not close to the underlying instrument's current price. In addition, exchanges may establish daily price fluctuation limits for options and futures contracts, and may halt trading if a contract's price moves upward or downward more than the limit in a given day. On volatile trading days when the price fluctuation limit is reached or a trading halt is imposed, it may be impossible for the respective Fund to enter into new positions or close out existing positions. In addition, if unable to close a future position, in the event of adverse price movements, a Fund would be required to make daily cash payments in order to maintain its required margin. In such

situation, if a Fund has insufficient cash, it may have to sell other portfolio securities at an inopportune time to meet daily margin requirements. If the secondary market for a contract is not liquid because of price fluctuation limits or otherwise, it could prevent prompt liquidation of unfavorable positions, and potentially could require the applicable Fund to continue to hold a position until delivery or expiration regardless of changes in its value. As a result, the Fund's access to other assets held to cover options or futures positions could also be impaired.

Exchange-Traded Funds (“ETFs”). The Funds may invest in ETFs. ETFs are investment companies, the shares of which are bought and sold on a securities exchange. The securities of an ETF are redeemable only in larger aggregation of a specified number of shares and generally on an in-kind basis. Generally, certain ETFs may represent a portfolio of securities designed to track the composition and/or performance of specific indexes or portfolio of specific indexes, while other ETFs may be actively managed that do not track an index (generally referred to as actively-managed ETFs). The market prices of ETF investments will fluctuate in accordance with both changes in the underlying portfolio securities of the investment company and also due to supply and demand of the investment company's shares on the exchange upon which its shares are traded. Index-based investments may not replicate or otherwise match the composition or performance of their specified index due to transaction costs, among other things. Examples of ETFs include SPDRs®, Select Sector SPDRs®, DIAMONDSSM, NASDAQ 100 Shares and iShares.

There are many reasons a Fund would purchase an ETF. For example, a Fund could purchase an ETF to temporarily gain exposure to a portion of the U.S. or a foreign market while awaiting an opportunity to purchase securities directly. The risks of owning an ETF generally reflect the risks of owning the underlying securities in which the ETF invests and the investment strategies of the ETF. However, lack of liquidity in an ETF could result in it being more volatile than the underlying portfolio of securities and ETFs have operating expenses, including management fees that increase their costs versus the costs of owning the underlying securities directly. The Funds may purchase ETFs to the extent permitted by the 1940 Act, rules thereunder or as described below, to the extent permitted by exemptive orders granted to the various ETFs by the SEC. (See also the description of “Securities of Other Investment Companies”).

Foreign Currency Transactions. The Funds may hold foreign currency deposits from time to time and may convert dollars and foreign currencies in the foreign exchange markets. Currency conversion involves dealer spreads and other costs, although commissions usually are not charged. Currencies may be exchanged on a spot (*i.e.*, cash) basis, or by entering into forward contracts to purchase or sell foreign currencies at a future date and price. Forward contracts generally are traded on an interbank market conducted directly between currency traders (usually large commercial banks) and their customers. The parties to a forward contract may agree to offset or terminate the contract before its maturity, or may hold the contract to maturity and complete the contemplated currency exchange.

The Funds may use currency forward contracts to manage currency risks and to facilitate transactions in foreign securities. The following discussion summarizes the principal currency management strategies involving forward contracts that could be used by the Funds.

In connection with purchases and sales of securities denominated in foreign currencies, the Funds may enter into currency forward contracts to fix a definite price for the purchase or sale in advance of the trade's settlement date. This technique is sometimes referred to as a “settlement hedge” or “transaction hedge.” The Adviser expects to enter into settlement hedges in the normal course of managing the respective Fund's foreign investments. The Funds could also enter into forward contracts to purchase or sell a foreign currency in anticipation of future purchases or sales of securities denominated in foreign currency, even if the specific investments have not yet been selected by the Adviser.

The Funds may also use forward contracts to hedge against a decline in the value of existing investments denominated in foreign currency. For example, if the Funds owned securities denominated

in pounds sterling, they could enter into a forward contract to sell pounds sterling in return for U.S. dollars to hedge against possible declines in the pound's value. Such a hedge, sometimes referred to as a "position hedge," would tend to offset both positive and negative currency fluctuations but would not offset changes in security values caused by other factors. The Funds could also hedge the position by selling another currency expected to perform similarly to the pound sterling—for example, by entering into a forward contract to sell European Currency Units in return for U.S. dollars. This type of hedge, sometimes referred to as a "proxy hedge," could offer advantages in terms of cost, yield, or efficiency, but generally would not hedge currency exposure as effectively as a simple hedge into U.S. dollars. Proxy hedges may result in losses if the currency used to hedge does not perform similarly to the currency in which the hedged securities are denominated.

SEC guidelines require mutual funds to set aside appropriate liquid assets in a segregated custodial account to cover forward currency contracts.

Successful use of forward currency contracts will depend on the Adviser's skill in analyzing and predicting currency values. Forward contracts may substantially change the respective Fund's investment exposure to changes in currency exchange rates, and could result in losses to the Fund if currencies do not perform as the Adviser anticipates. For example, if a currency's value rose at a time when the Adviser had hedged the Funds by selling that currency in exchange for U.S. dollars, the Funds would be unable to participate in the currency's appreciation. If the Adviser hedges currency exposure through proxy hedges, the Funds could realize currency losses from the hedge and the security position at the same time if the two currencies do not move in tandem. Similarly, if the Adviser increases the applicable Fund's exposure to a foreign currency, and that currency's value declines, the Funds will realize a loss. There is no assurance that the Adviser's use of forward currency contracts will be advantageous to the Funds or that it will hedge at an appropriate time. The policies described in this section are non-fundamental policies of the Funds.

Foreign Securities. Under normal market conditions, the assets of the Grandeur Peak Global Contrarian Fund, Grandeur Peak Global Explorer Fund, Grandeur Peak Global Micro Cap Fund, Grandeur Peak Global Opportunities Fund, Grandeur Peak Global Reach Fund, and Grandeur Peak Global Stalwarts Fund (at least 40% at the time of purchase) will be invested outside of the United States. The Grandeur Peak International Opportunities Fund, Grandeur Peak International Stalwarts Fund, and Grandeur Peak Emerging Markets Opportunities Fund may invest in securities issued by foreign companies without limitation. The Grandeur Peak US Stalwarts Fund may also invest in securities of companies economically tied to countries outside of the United States. Investments in foreign countries involve certain risks which are not typically associated with U.S. investments.

Additional Risks of Foreign Securities.

Foreign Securities Markets. Trading volume on foreign country and, in particular, emerging market stock exchanges is substantially less than that on the New York Stock Exchange ("NYSE"). Further, securities of some foreign and, in particular, emerging market companies are less liquid and more volatile than securities of comparable U.S. companies. Fixed commissions on foreign exchanges are generally higher than negotiated commissions on U.S. exchanges. The Funds endeavor to achieve the most favorable net results on their portfolio transactions and may be able to purchase securities on other stock exchanges where commissions are negotiable. Foreign stock exchanges, brokers, custodians and listed companies may be subject to less government supervision and regulation than in the United States. The customary settlement time for foreign securities may be longer than the customary three day settlement time for U.S. securities.

Companies in foreign countries are not generally subject to the same accounting, auditing and financial reporting standards, practices and disclosure requirements comparable to those applicable to U.S. companies. Consequently, there may be less publicly available information about a foreign company than about a U.S. company. Certain markets may require payment for securities before delivery and

delays may be encountered in settling securities transactions. In some foreign markets, there may not be protection against failure by other parties to complete transactions. There may be limited legal recourse against an issuer in the event of a default on a debt instrument.

Currency Risk. The value of the assets of a Fund, as measured in U.S. dollars may be affected favorably or unfavorably by changes in foreign currency exchange rates and exchange control regulations. A change in the value of any foreign currency relative to the U.S. dollar may cause a corresponding change in the dollar value of a Fund's assets that are denominated or traded in that country. In addition, a Fund may incur costs in connection with conversion between various currencies.

Political and Economic Risk. Foreign investments may be subject to heightened political and economic risks, particularly in underdeveloped or developing countries which may have relatively unstable governments and economies based on only a few industries. In some countries, there is the risk that the government could seize or nationalize companies, could impose additional withholding taxes on dividends or interest income payable on securities, could impose exchange controls or adopt other restrictions that could affect a Fund's investments.

Regulatory Risk. Foreign companies not publicly traded in the U.S. are not subject to the regulatory requirements of U.S. companies. There may be less publicly available information about such companies. Foreign companies are not subject to accounting, auditing and financial reporting standards and requirements comparable to those applicable to U.S. companies.

Foreign Tax Risk. The Funds' income from foreign issuers may be subject to non-U.S. withholding taxes. The Funds may also be subject to taxes on trading profits or on transfers of securities in some countries. To the extent foreign income taxes are paid by the Funds, shareholders may not be entitled to a credit or deduction for U.S. tax purposes.

Transaction Costs. Transaction costs of buying and selling foreign securities, including brokerage, tax and custody charges, are generally higher than those of domestic transactions.

Emerging Markets. The Funds may invest in securities issued by companies domiciled in countries with emerging markets. Investing in securities of issuers domiciled in countries with emerging securities markets entail greater risks than investing in securities of issuers domiciled in countries with more mature securities markets. These risks may include (i) less social, political and economic stability; (ii) small current size of markets for such securities and low or nonexistent trading volume, which result in lack of liquidity and greater price volatility; (iii) certain national policies which may restrict the Funds' investment opportunities, including restrictions on investments in issuers or industries deemed sensitive to national interests; (iv) foreign taxation; and (v) the absence of developed structures governing private or foreign investment or allowing for judicial redress for injury to private property.

Illiquid Securities. Under SEC rules, an investment in a security is generally deemed to be "illiquid" if it cannot be disposed of within seven days in the ordinary course of business at approximately the amount at which such security is valued by the Funds.

The Board has authorized the Adviser to make liquidity determinations with respect to certain securities, including Rule 144A securities. A foreign security that may be freely traded on or through the facilities of an offshore exchange or other established offshore securities market is not deemed to be an illiquid security.

Each Fund may invest up to 15% of its net assets in illiquid securities including "restricted" securities and private placements for which there is no public market value.

Securities in which a Fund may invest include securities issued by corporations without registration under the Securities Act of 1933, as amended (the "1933 Act"), such as securities issued in reliance on the so-called "private placement" exemption from registration which is afforded by Section 4(2) of the 1933 Act ("Section 4(2) securities"). Section 4(2) securities are restricted as to disposition under the

Federal securities laws, and generally are sold to institutional investors such as the Funds who agree that they are purchasing the securities for investment and not with a view to public distribution. Any resale must also generally be made in an exempt transaction. Section 4(2) securities are normally resold to other institutional investors through or with the assistance of the issuer or investment dealers who make a market in such Section 4(2) securities, thus providing liquidity. Any such restricted securities will be considered to be illiquid for purposes of the Fund's limitations on investments in illiquid securities unless, pursuant to procedures adopted by the Board, the Adviser has determined such securities to be liquid because such securities are eligible for resale under Rule 144A under the 1933 Act and are readily saleable.

The fair value of these securities will be determined in accordance with Board-approved Pricing Policies and Procedures. Given the inherent uncertainties of estimating fair market value, there can be no assurance that the value placed on a security will be appropriate in terms of how the security may be ultimately valued on the public market. These securities may never be publicly traded and the Funds may not be able to easily liquidate positions in these securities.

If illiquid securities exceed 15% of a Fund's net assets after the time of purchase, the Fund will take steps to reduce, in an orderly fashion, its holdings of illiquid securities. Because illiquid securities may not be readily marketable, the Adviser may not be able to dispose of them in a timely manner. As a result, the Fund may be forced to hold illiquid securities while their prices depreciate. Depreciation in the prices of illiquid securities may cause the net asset value of a Fund to decline.

Lending of Portfolio Securities. Consistent with applicable regulatory requirements, the Funds may lend their portfolio securities to brokers, dealers and financial institutions, in accordance with policies and procedures of the Trust, as may be adopted from time to time. The procedure for the lending of securities will typically include the following features and conditions. The collateral will consist either of U.S. Government securities or the borrower of the securities will deposit cash with the Fund in an amount equal to a minimum of 100% of the market value of the securities lent. The Fund will seek to invest the collateral in short-term debt securities, cash equivalents (or pooled investment vehicle interests in cash, cash equivalents and short-term debt instruments) and earn the income thereon. A negotiated portion of the income so earned may be paid to the borrower or the broker who arranged the loan. The collateral will be marked to market daily, and if the value of the collateral drops below the required minimum at any time, the borrower may typically be called upon to post additional collateral. These will be "demand" loans and may be terminated by the Fund at any time. The Fund will receive any dividends and interest paid on the securities lent, although the tax characteristics of such payment may change. The Fund's performance will continue to reflect changes in the value of the securities loaned.

These transactions must be fully collateralized at all times, but involve some credit risk to the Fund if the borrower or the party (if any) guaranteeing the loan should default on its obligations. In the event of the default or bankruptcy of the other party to a securities loan, the Fund could experience delays in recovering the securities it lent. To the extent that, in the meantime, the value of the securities the Fund lent has increased or the value of the collateral decreased, the Fund could experience a loss. In the event of a default by the borrower, the Fund will, if permitted by law, dispose of such collateral except that the Fund may retain any such part thereof that is a security in which the Fund is permitted to invest.

Although voting rights or rights to consent with respect to the loaned securities pass to the borrower, the Fund, as the lender, generally retains the right to call the loans and obtain the return of the securities loaned at any time on reasonable notice, and it will attempt to do so in order that the securities may be voted by the Fund if the holders of such securities are asked to vote upon or consent to matters which the Adviser believes materially affect the investment; however, the Fund may not be able to recall the securities in time for the Fund to be the owner on the record date for determining shareholders entitled to vote or consent on the matter. The Fund may typically also call such loans in order to sell the securities involved.

Money Market Instruments. Each Fund may invest in a variety of money market instruments for pending investments, to meet anticipated redemption requests and/or to retain the flexibility to respond promptly to changes in market, economic or political conditions and/or when the Adviser takes temporary defensive positions, including when the Adviser is unable to locate attractive investment opportunities or when the Adviser considers market, economic or political conditions to be unfavorable for profitable investing. Money Market Instruments include, but are not limited to, the following instruments. Commercial paper represents short-term unsecured promissory notes issued in bearer form by banks or bank holding companies, corporations and finance companies. Issues of commercial paper normally have maturities of less than nine months and fixed rates of return. A Fund may purchase commercial paper consisting of issues rated at the time of purchase by one or more appropriate nationally recognized statistical rating organizations (“NRSRO”) (e.g., Standard & Poor’s Corporation and Moody’s Investors Service, Inc.) in one of the two highest rating categories for short-term debt obligations. The Funds may also invest in commercial paper that is not rated but that is determined by the Adviser to be of comparable quality to instruments that are so rated by an NRSRO that is neither controlling, controlled by, or under common control with the issuer of, or any issuer, guarantor, or provider of credit support for, the instruments. Certificates of deposit are generally negotiable certificates issued against funds deposited in a commercial bank or a savings and loan association for a definite period of time and earning a specified return. Bankers’ acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are “accepted” by a bank, meaning, in effect, that the bank unconditionally agrees to pay the face value of the instrument on maturity. Bankers’ acceptances invested in by a Fund will be those guaranteed by domestic and foreign banks having, at the time of investment, capital, surplus, and undivided profits in excess of \$100,000,000 (as of the date of their most recently published financial statements). Fixed time deposits are bank obligations payable at a stated maturity date and bearing interest at a fixed rate. Fixed time deposits may be withdrawn on demand by the investor, but may be subject to early withdrawal penalties that vary depending upon market conditions and the remaining maturity of the obligation. There are no contractual restrictions on the right to transfer a beneficial interest in a fixed time deposit to a third party, although there is no market for such deposits. Bank notes and bankers’ acceptances rank junior to deposit liabilities of the bank and pari passu with other senior, unsecured obligations of the bank. Bank notes are classified as “other borrowings” on a bank’s balance sheet, while deposit notes and certificates of deposit are classified as deposits. Bank notes are not insured by the Federal Deposit Insurance Corporation or any other insurer. Deposit notes are insured by the Federal Deposit Insurance Corporation only to the extent of \$250,000 per depositor per bank. Certificates of deposit and demand and time deposits will be those of domestic banks and savings and loan associations, if (a) at the time of investment the depository institution has capital, surplus, and undivided profits in excess of \$100,000,000 (as of the date of its most recently published financial statements), or (b) the principal amount of the instrument is insured in full by the Federal Deposit Insurance Corporation.

Mortgage-Related Securities. The Funds may, consistent with their investment objective and policies, invest in mortgage-related securities issued or guaranteed by the U.S. Government or its agencies or instrumentalities or issued by nongovernmental entities.

Mortgage-related securities, for purposes of the Prospectus and this Statement of Additional Information, represent pools of mortgage loans assembled for sale to investors by various governmental agencies such as the Government National Mortgage Association (“GNMA”) and government-related organizations such as the Federal National Mortgage Association (“FNMA”), as well as by nongovernmental issuers such as commercial banks, savings and loan institutions, mortgage bankers and private mortgage insurance companies. Although certain mortgage-related securities are guaranteed by a third party or otherwise similarly secured, the market value of the security, which may fluctuate, is not so secured. If a Fund purchases a mortgage-related security at a premium, that portion may be lost if there is a decline in the market value of the security whether resulting from changes in

interest rates or prepayments in the underlying mortgage collateral. As with other interest-bearing securities, the prices of such securities are inversely affected by changes in interest rates. However, though the value of a mortgage-related security may decline when interest rates rise, the converse is not necessarily true, since in periods of declining interest rates the mortgages underlying the securities are prone to prepayment, thereby shortening the average life of the security and shortening the period of time over which income at the higher rate is received. Conversely, when interest rates are rising, the rate of prepayment tends to decrease, thereby lengthening the average life of the security and lengthening the period of time over which income at the lower rate is received. For these and other reasons, a mortgage-related security's average maturity may be shortened or lengthened as a result of interest rate fluctuations and, therefore, it is not possible to predict accurately the security's return to a Fund. In addition, regular payments received in respect of mortgage-related securities include both interest and principal. No assurance can be given as to the return a Fund will receive when these amounts are reinvested.

The Funds may also invest in mortgage-related securities which are collateralized mortgage obligations structured on pools of mortgage pass-through certificates or mortgage loans. Mortgage-related securities will be purchased only if rated in the three highest bond rating categories assigned by one or more appropriate NRSROs, or, if unrated, which the Adviser deems to be of comparable quality.

There are a number of important differences among the agencies and instrumentalities of the U.S. Government that issue mortgage-related securities and among the securities that they issue. Mortgage-related securities issued by the GNMA include GNMA Mortgage Pass-Through Certificates (also known as "Ginnie Maes") which are guaranteed as to the timely payment of principal and interest by GNMA and such guarantee is backed by the full faith and credit of the United States. GNMA is a wholly-owned U.S. Government corporation within the Department of Housing and Urban Development. GNMA certificates also are supported by the authority of GNMA to borrow funds from the U.S. Treasury to make payments under its guarantee. Mortgage-related securities issued by the FNMA include FNMA Guaranteed Mortgage Pass-Through Certificates (also known as "Fannie Maes") which are solely the obligations of the FNMA and are not backed by or entitled to the full faith and credit of the United States. FNMA is a government-sponsored organization owned entirely by private stockholders. Fannie Maes are guaranteed as to timely payment of the principal and interest by FNMA. Mortgage-related securities issued by the Federal Home Loan Mortgage Corporation ("FHLMC") include FHLMC Mortgage Participation Certificates (also known as "Freddie Macs" or "PCs"). FHLMC is a corporate instrumentality of the United States, created pursuant to an Act of Congress, which is owned entirely by Federal Home Loan Banks. Freddie Macs are not guaranteed by the United States or by any Federal Home Loan Bank and do not constitute a debt or obligation of the United States or of any Federal Home Loan Bank. Freddie Macs entitle the holder to timely payment of interest, which is guaranteed by FHLMC. FHLMC guarantees either ultimate collection or timely payment of all principal payments on the underlying mortgage loans. When FHLMC does not guarantee timely payment of principal, FHLMC may remit the amount due on account of its guarantee of ultimate payment of principal at any time after default on an underlying mortgage, but in no event later than one year after it becomes payable. In September 2008, FNMA and FHLMC were placed into conservatorship overseen by the Federal Housing Finance Agency ("FHFA"). As conservator, FHFA will succeed to the rights, titles, powers and privileges of the company and any stockholder, officer or director of such company with respect to the company and its assets and title to all books, records and assets of the company held by any other custodian or third party. The conservator is then charged with operating the company.

Under the direction of the Federal Housing Finance Agency, Fannie Mae and Freddie Mac have entered into a joint initiative to develop a common securitization platform for the issuance of a uniform mortgage-backed security (the "Single Security Initiative"), which would generally align the characteristics of Fannie Mae and Freddie Mac certificates. The Single Security Initiative was launched in June 2019, and as of this time, the long-term effects it may have on the market for mortgage-backed securities

remains uncertain.

Municipal Obligations. The Funds may invest in municipal securities whose interest, in the opinion of the securities' counsel, is exempt from federal income tax and from the federal alternative minimum tax. Neither the Adviser nor a Fund guarantees that this opinion is correct, and there is no assurance that the IRS will agree with such counsel's opinion. If certain types of investments the Fund buys as tax-exempt are later ruled to be taxable, a portion of the Fund's income could be taxable. A Fund would be eligible to pay dividends in any year that are tax exempt in the hands of the Fund's shareholders only if, at the end of each quarter of the year, at least 50% of the value of the Fund's total assets consistent of obligations that are exempt under Section 103 of the Internal Revenue Code of 1986, as amended (the "Code") or the Fund qualifies as a "qualified fund of funds" by investing at least 50% of its total assets in other regulated investment companies. There is no expectation that any Fund will be eligible to pay tax-exempt dividends under either rule. To the extent that a Fund invests in municipal securities from a given state or geographic region, its share price and performance could be affected by local, state and regional factors, including erosion of the tax base and changes in the economic climate. National governmental actions, such as the elimination of tax-exempt status, also could affect performance. A Fund may be more sensitive to adverse economic, business or political developments if it invests a substantial portion of its assets in municipal securities financing similar projects. A change that affects one project, such as proposed legislation on the financing of the project, a shortage of the materials needed for the project, or a declining need for the project, may affect similar projects and the overall municipal securities market.

Non-investment Grade Securities. The Funds may invest up to 10% of their total assets in non-investment grade securities subject to the following. Such securities include high yield (junk) bonds, convertible bonds, preferred stocks and convertible preferred stocks.

Non-investment grade bonds are debt securities rated Ba or lower by Moody's or BB or lower by S&P. They generally offer greater returns in the form of higher average yields than investment grade debt securities (rated Baa or higher by Moody's or BBB or higher by S&P). Non-investment grade debt securities involve greater risks than investment grade debt securities including greater sensitivity to changes in interest rates, the economy, the issuer's solvency and liquidity in the secondary trading market. See [Appendix A](#) for a description of corporate bond ratings.

Yields on non-investment grade debt securities will fluctuate over time. The prices of non-investment grade debt securities have been found to be less sensitive to interest rate changes than investment grade debt securities, but more sensitive to adverse economic changes or individual issuer developments. During an economic downturn or a sustained period of rising interest rates, highly leveraged issuers may experience financial stress which would adversely affect their ability to pay principal and interest obligations, meet projected business goals and to obtain additional financing. If the issuer of a debt security held by a Fund defaulted, the Fund might incur additional expenses seeking to recover the issuer's defaulted obligation. In addition, periods of economic uncertainty and changes can be expected to result in increased volatility of market prices of non-investment grade debt securities and a Fund's net asset value. Furthermore, the market prices of non-investment grade debt securities structured as zero coupon or payment-in-kind securities are affected to a greater extent by interest rate changes and tend to be more volatile than securities that pay interest periodically and in cash.

Non-investment grade debt securities present risks based on payment expectations. For example, they may contain redemption or call provisions. If an issuer exercises these provisions in a declining interest rate market, a Fund would have to replace the security with a lower-yielding security, resulting in a decreased return for investors. A high-yielding security's value will decrease in a rising interest rate market and will result in a corresponding decrease in the value of a Fund's assets. Unexpected net redemptions may force a Fund to sell securities including, but not limited to, non-investment grade debt securities, without regard to their investment merits, thereby decreasing the asset base upon which a Fund's expenses can be spread and possibly reducing the rate of return.

To the extent that there is no established secondary market, there may be thin trading of non-investment grade securities, including high yield bonds, convertible bonds, preferred stocks and convertible preferred stocks held by a Fund. This may adversely affect the ability of the Adviser or the Funds' Board of Trustees to accurately value a Fund's non-investment grade securities and a Fund's assets and may also adversely affect a Fund's ability to dispose of the securities. In the absence of an established secondary market, valuing securities becomes more difficult and judgment plays a greater role in valuation because there is less reliable, objective data available. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the value and liquidity of non-investment grade securities, especially in a thinly traded market. Illiquid or restricted non-investment grade securities purchased by a Fund may involve special registration responsibilities, liabilities and costs, and liquidity and valuation difficulties.

Certain risks are associated with applying ratings as a method for evaluating non-investment grade securities. For example, credit ratings for bonds evaluate the safety of principal and interest payments, not the market value risk of such securities. Credit rating agencies may fail to timely change credit ratings to reflect subsequent events. The Adviser continuously monitors the issuers of non-investment grade debt securities held by a Fund to determine if the issuers will have sufficient cash flow and profits to meet required principal and interest payments and to assure the securities' liquidity. A Fund may be more dependent upon the Adviser's own analysis of non-investment grade securities than is the case for investment grade securities. Also, a Fund may retain a portfolio security whose rating has been changed if the security otherwise meets a Fund's investment criteria.

Credit Risk. Credit risk is the risk that the issuer of a debt security will fail to make payments on the security when due. Securities rated non-investment grade are particularly subject to credit risk. These securities are predominantly speculative and are commonly referred to as "junk bonds." To the extent a Fund purchases or holds convertible or other non-investment grade securities, a Fund may be exposed to greater risk that the issuer will not repay principal, or pay interest or dividends on such securities in a timely manner.

Ratings published by rating agencies seek to measure credit risk (Rating agencies' descriptions of non-investment grade securities are contained in Appendix A of this SAI). The lower a bond issue is rated by an agency, the more credit risk it is considered to represent. Lower-rated bonds generally pay higher yields to compensate investors for the greater risk.

Interest Rate Risk. Interest rate risk is the risk that the value of a fixed-rate debt security will decline due to changes in market interest rates. Even though some interest-bearing securities are investments which offer a stable stream of income at relatively high current yield, the prices of such securities are affected by changes in interest rates and are therefore subject to market price fluctuations. The value of fixed income securities varies inversely with changes in market interest rates. When interest rates rise, the value of a Fund's fixed income securities, and therefore its net asset value per share, generally will decline. In general, the value of fixed-rate debt securities with longer maturities is more sensitive to changes in market interest rates than the value of such securities with shorter maturities. Thus, if a Fund is invested in fixed income securities with longer weighted average maturities, the net asset value of a Fund should be expected to have greater volatility in periods of changing market interest rates.

Preferred Stock. The Funds may invest in preferred stock. Preferred stock, unlike common stock, may offer a stated dividend rate payable from the issuer's earnings. Preferred stock dividends may be cumulative, non-cumulative, participating or auction rate. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stock may have mandatory sinking fund provisions, as well as call/redemption provisions prior to maturity, a negative feature when interest rates decline. For a description of preferred stock ratings, see Appendix A.

Real Estate Securities. The Funds may invest in real estate investment trusts ("REITs"). REITs pool

investors' funds for investment primarily in income producing real estate or real estate loans or interests. A REIT is not taxed on income distributed to shareholders if it complies with several requirements relating to its organization, ownership, assets, and income and a requirement that it distribute to its shareholders at least 90% of its taxable income (other than net capital gains) for each taxable year. While there are many types of REITs, all REITs can generally be classified as Equity REITs, Mortgage REITs and Hybrid REITs. Equity REITs, which invest the majority of their assets directly in real property, derive their income primarily from rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs, which invest the majority of their assets in real estate mortgages, derive their income primarily from interest payments. Hybrid REITs combine the characteristics of both Equity REITs and Mortgage REITs. The Funds will not invest in real estate directly, but only in securities issued by real estate companies. The risks of investing in REITs include declines in the value of real estate, risks related to general and local economic conditions, dependency on management skill, heavy cash flow dependency, possible lack of availability of mortgage funds, overbuilding, extended vacancies of properties, increased competition, increases in property taxes and operating expenses, changes in zoning laws, losses due to costs resulting from the clean-up of environmental problems, liability to third parties for damages resulting from environmental problems, casualty or condemnation losses, limitations on rents, changes in neighborhood values, the appeal of properties to tenants and changes in interest rates.

In addition to these risks, Equity REITs may be affected by changes in the value of the underlying property owned by the trusts, while Mortgage REITs may be affected by the quality of any credit extended. Further, REITs are dependent upon management skills and generally may not be diversified. REITs are also subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. In addition, REITs could possibly fail to qualify for the beneficial tax treatment available to REITs under the Code, or to maintain their exemptions from registration under the 1940 Act. The above factors may also adversely affect a borrower's or a lessee's ability to meet its obligations to the REIT. In the event of a default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting investments.

Repurchase Agreements. Each Fund may agree to purchase repurchase agreement securities from financial institutions (including clearing firms registered with the SEC that provide comparison, netting and settlement services to their members with respect to repurchase agreement transactions), and the corporate parents or affiliates of such financial institutions or clearing firms, subject to the seller's agreement to repurchase them at a mutually agreed upon date and price ("repurchase agreements"). Although the underlying securities' collateral related to a repurchase agreement may bear maturities exceeding one year, the term and settlement for the repurchase agreement security will never be more than one year and normally will be within a shorter period of time (often one business day). Underlying securities' collateral related to repurchase agreements is held either by the Funds' custodian or sub-custodian (if any). The seller, under a repurchase agreement, will be required to maintain the value of the securities subject to the agreement in an amount exceeding the repurchase price (including accrued interest). Repurchase agreements may be considered loans to the seller, collateralized by the underlying securities. The risk to a Fund includes the ability of the seller to pay the agreed upon sum on the repurchase date; in the event of default, the repurchase agreement provides that a Fund is entitled to sell the underlying securities' collateral. If the value of the collateral declines after the agreement is entered into, however, and if the seller defaults under a repurchase agreement when the value of the underlying collateral is less than the repurchase price, a Fund could incur a loss of both principal and interest. The Funds' custodian monitors the value of the collateral at the time the action is entered into and at all times during the term of the repurchase agreement. This is done in an effort to determine whether the value of the collateral always equals or exceeds the agreed upon repurchase price to be paid to the Fund. If the seller were to be subject to a federal bankruptcy proceeding, the ability of a Fund to liquidate the collateral could be delayed or impaired because of certain provisions of the bankruptcy laws.

In addition, the Funds may invest in repurchase agreements for pending investments, to meet anticipated redemption requests, to retain the flexibility to respond promptly to changes in market, economic or political conditions and/or when the Adviser takes temporary defensive positions, including when the Adviser is unable to locate attractive investment opportunities or when the Adviser considers market, economic or political conditions to be unfavorable for profitable investing.

Reverse Repurchase Agreements. The Funds may borrow funds by entering into reverse repurchase agreements in accordance with that Fund's investment restrictions. Pursuant to such agreements, each Fund would sell portfolio securities to financial institutions such as banks and broker-dealers, and agree to repurchase the securities at a mutually agreed-upon date and price. A Fund intends to enter into reverse repurchase agreements only to avoid otherwise selling securities during unfavorable market conditions to meet redemptions. At the time a Fund enters into a reverse repurchase agreement, it will place in a segregated custodial account assets such as U.S. Government securities or other liquid securities consistent with the Fund's investment restrictions having a value equal to the repurchase price (including accrued interest), and will subsequently continually monitor the account to ensure that such equivalent value is maintained at all times. Reverse repurchase agreements involve risks relating to leveraging, discussed above under "Borrowing to Purchase Securities (Leveraging)" and the risk that the market value of the securities sold by a Fund may decline below the price at which a Fund is obligated to repurchase the securities. Reverse repurchase agreements are considered to be borrowings by a Fund under the 1940 Act.

Securities of Other Investment Companies. The Funds may purchase the securities of other investment companies, including foreign and domestic registered and unregistered open-end funds, closed-end funds, unit investment trusts and ETFs if the purchase is in compliance with the 1940 Act, rules thereunder or any exemptive relief in which a Fund may rely. As a shareholder of another investment company, a Fund would bear its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the expenses each Fund bears directly in connection with its own operations. If a Fund invests in securities of other investment companies, the return on any such investment will be reduced by the operating expenses, including investment advisory and administrative fees, of such investment companies. (Such Fund indirectly absorbs its pro rata share of the other investment companies' expenses.) However, the Adviser believes that at times the return and liquidity features of these securities may be more beneficial than other types of securities.

Except as described in the following paragraph, the Funds currently intend to limit investments in securities issued by other investment companies so that, as determined immediately after a purchase of such securities is made: (i) not more than 5% of the value of a Fund's total assets will be invested in the securities of any one investment company; (ii) not more than 10% of the value of its total assets will be invested in the aggregate in securities of investment companies as a group; and (iii) not more than 3% of the outstanding voting stock of any one investment company will be owned by a Fund. These limitations do not apply to investments in investment companies through a master-feeder type arrangement. In addition, to the extent allowed by law or regulation, a Fund may invest its assets in securities of investment companies that are money market funds, including those advised by the Adviser or otherwise affiliated with the Adviser, in excess of the limits discussed above.

With respect to a Fund's investments in ETFs, pursuant to certain specific exemptive orders issued by the SEC to several ETFs, and procedures approved by the Board, an Equity Fund may invest in certain ETFs in excess of the limits described above, provided that the Fund has described ETF investments in its Prospectus and otherwise complies with the conditions of the applicable SEC exemptive orders, each as may be amended, and any other applicable investment limitations.

Short Sales. The Funds may make short sales of securities. Short sales are transactions in which a Fund sells a security it does not own in anticipation of a decline in the market value of that security. The Fund must borrow the security to deliver to the buyer upon the short sale. The Fund is then

obligated to replace the borrowed security by purchasing it at a later date. A short sale provides a possible hedge against the market risk of the value of other investments and protects a Fund in a declining market.

Short sales are subject to the risk that a Fund will incur a loss if the price of a security sold short increases between the date of the short sale and the date the Fund closes the short sale. Any gain on a short sale will be decreased, and the amount of any loss increased, by the amount of the premium, dividends, interest or expenses the Fund may be required to pay in connection with a short sale. An increase in the value of a security sold short by a Fund over the price at which it was sold short will result in a loss to the Fund, and there can be no assurance that the Fund will be able to close out the position at any particular time or at an acceptable price. Except in the case of short sales “against the box,” a Fund’s market risk is unlimited in that the potential for increase in the market price of the security sold short is unlimited. Short sales “against the box” mean that the Fund owns securities identical to those sold short.

When a short position is closed out, it may result in a short-term capital gain or loss for federal income tax purposes. In a generally rising market, if a Fund maintains short positions in securities rising with the market, the net asset value of the Fund would increase to a lesser extent than if it had not engaged in short sales.

The Adviser may consider short selling when the Adviser finds companies it believes are substantially overpriced. Short selling may also be considered in arbitrage and hedge situations, and short selling might also be used under certain circumstances to defer taxes.

An eligible Fund will not engage in short sales of securities when these transactions would cause the market value of all of its securities sold short to exceed 15% of its net assets subject to the following. The value of the securities of any one issuer that may be shorted by a Fund is limited to the lesser of 5% of the value of the Fund’s net assets or 5% of the securities of any class of the issuer. All short sales must be fully collateralized. The Funds maintain the collateral in a segregated account with their custodian. The collateral consists of cash, U.S. government securities or any other liquid securities equal to the market value of the securities at the time of the short sale. The Funds will thereafter maintain, on a daily basis, the collateral to ensure that it is equal to the current market value of the securities sold short. Short sales against the box are not subject to the 15% limitation. A capital gain or loss is recognized immediately upon the sale of a short against the box. A Fund may only engage in short sale transactions in securities listed on one or more U.S. or foreign securities exchanges or on NASDAQ or Nasdaq.

Stripped Obligations. The Funds may purchase Treasury receipts and other “stripped” securities that evidence ownership in either the future interest payments or the future principal payments on U.S. Government obligations. These participations, which may be issued by the U.S. Government (or a U.S. Government agency or instrumentality) or by private issuers such as banks and other institutions, are issued at a discount from their “face value,” and may include stripped mortgage-backed securities (“SMBS”). Stripped securities, particularly SMBS, may exhibit greater price volatility than ordinary debt securities because of the manner in which their principal and interest are returned to investors.

SMBS are usually structured with two or more classes that receive different proportions of the interest and principal distributions from a pool of mortgage-backed obligations. A common type of SMBS will have one class receiving all of the interest, while the other class receives all of the principal. However, in some cases, one class will receive some of the interest and most of the principal while the other class will receive most of the interest and the remainder of the principal. If the underlying obligations experience greater than anticipated prepayments of principal a Fund may fail to fully recoup its initial investment. The market value of the class consisting entirely of principal payments can be extremely volatile in response to changes in interest rates. The yields on a class of SMBS that receives all or most of the interest are generally higher than prevailing market yields on other mortgage-backed obligations

because their cash flow patterns are also volatile and there is a greater risk that the initial investment will not be fully recouped.

SMBS issued by the U.S. Government (or a U.S. Government agency or instrumentality) may be considered liquid under guidelines established by the Board of Trustees if they can be disposed of promptly in the ordinary course of business at a value reasonably close to that used in the calculation of a Fund's per share net asset value.

The Treasury Department has facilitated transfers of ownership of zero coupon securities by accounting separately for the beneficial ownership of particular interest coupon and principal payments on Treasury securities through the Federal Reserve book-entry record-keeping system. A Fund may purchase securities registered in the STRIPS program. Under the STRIPS program, a Fund will be able to have beneficial ownership of zero coupon securities recorded directly in the book-entry record-keeping system in lieu of having to hold certificates or other evidences of ownership of the underlying U.S. Treasury securities.

In addition, the Funds may acquire U.S. Government obligations and their unmatured interest coupons that have been separated ("stripped") by their holder, typically a custodian bank or investment brokerage firm. Having separated the interest coupons from the underlying principal of the U.S. Government obligations, the holder will resell the stripped securities in custodial receipt programs with a number of different names, including "Treasury Income Growth Receipts" ("TIGRs") and "Certificate of Accrual on Treasury Securities" ("CATS"). The stripped coupons are sold separately from the underlying principal, which is usually sold at a deep discount because the buyer receives only the right to receive a future fixed payment on the security and does not receive any rights to periodic interest (cash) payments. The underlying U.S. Treasury bonds and notes themselves are held in book-entry form at the Federal Reserve Bank or, in the case of bearer securities (*i.e.*, unregistered securities which are ostensibly owned by the bearer or holder), in trust on behalf of the owners. Counsel to the underwriters of these certificates or other evidences of ownership of U.S. Treasury securities have stated that, in their opinion, purchasers of the stripped securities most likely will be deemed the beneficial holders of the underlying U.S. Government obligations for federal tax purposes. The Adviser is unaware of any binding legislative, judicial or administrative authority on this issue.

Swap Agreements. The Funds may enter into credit default swaps, interest rate swaps and currency swaps. In a typical interest rate swap, one party agrees to make regular payments equal to a floating interest rate multiplied by a "notional principal amount," in return for payments equal to fixed rate multiplied by the same amount, for a specified period of time. If a swap agreement provides for payments in different currencies, the parties might agree to exchange the notional principal amount as well. The credit default swap allows a Fund to manage credit risk through buying and selling credit protection on specific names or a basket of names. A "buyer" of credit protection agrees to pay a counterparty to assume the credit risk of an issuer upon the occurrence of certain events. The "seller" of credit protection receives a premium and agrees to assume the credit risk of an issuer upon the occurrence of certain events.

Swap agreements will tend to shift a Fund's investment exposure from one type of investment to another. Depending on how they are used, swap agreements may increase or decrease the overall volatility of a Fund's investments and its share price and yield.

Each Fund will segregate or earmark liquid assets to cover its net obligations under a swap agreement. In the case of swap agreements that do not cash settle, currently a Fund will typically set aside liquid assets equal to the full notional value of the swap agreement while the positions are open. With respect to swap agreements that do cash settle, however, a Fund may set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligations (*i.e.*, the Fund's daily net liability) under the swap agreement, if any, rather than their full notional value. Please see "**Asset Coverage for Futures and Options Position**" in this SAI.

Certain standardized swap transactions are currently subject to mandatory central clearing or may be eligible for voluntary central clearing. Central clearing is expected to decrease counterparty risk and increase liquidity compared to uncleared swaps because central clearing interposes the central clearinghouse as the counterpart to each participant's swap. However, central clearing does not eliminate counterparty risk or illiquidity risk entirely. In addition depending on the size of a fund and other factors, the margin required under the rules of a clearinghouse and by a clearing member may be in excess of the collateral required to be posted by a fund to support its obligations under a similar uncleared swap.

A Fund may enter into swaps with members of the Federal Reserve System, members of the New York Stock Exchange or other entities determined by the Adviser to be creditworthy.

United States Government Securities. To the extent consistent with their investment objectives, the Funds may invest in a variety of U.S. Treasury obligations consisting of bills, notes and bonds, which principally differ only in their interest rates, maturities and time of issuance. The Funds may also invest in other securities issued or guaranteed by the U.S. government, its agencies or instrumentalities. Obligations of certain agencies and instrumentalities, such as GNMA, are supported by the full faith and credit of the U.S. Treasury; others, such as those of the Export-Import Bank of the United States, are supported by the right of the issuer to borrow from the Treasury; others, such as those of FNMA, are supported by the discretionary authority of the U.S. government to purchase the agency's obligations; still others, such as those of the Student Loan Marketing Association ("SLMA"), are supported only by the credit of the instrumentalities. Obligations of the International Bank for Reconstruction and Development (also known as the World Bank) are supported by subscribed, but unpaid, commitments of its member countries. There is no assurance that these commitments will be undertaken or complied with in the future.

In addition, in September 2008 FNMA and FHLMC were placed into conservatorship overseen by the FHFA. As conservator, FHFA will succeed to the rights, titles, powers and privileges of the company and any stockholder, officer or director of such company with respect to the company and its assets and title to all books, records and assets of the company held by any other custodian or third party. The conservator is then charged with operating the company.

Securities guaranteed as to principal and interest by the U.S. government, its agencies or instrumentalities are deemed to include: (a) securities for which the payment of principal and interest is backed by an irrevocable letter of credit issued by the U.S. government or an agency or instrumentality thereof; and (b) participations in loans made to foreign governments or their agencies that are so guaranteed. The secondary market for certain of these participations is limited. Such participations will therefore be regarded as illiquid. No assurance can be given that the U.S. government would provide financial support to its agencies or instrumentalities if it is not obligated to do so by law.

U.S. Treasury Inflation-Protection Securities (TIPS). The Funds may invest in U.S. Treasury Inflation-Protection Securities. Inflation-protection securities are a type of marketable book-entry security issued by the United States Department of Treasury ("Treasury") with a nominal return linked to the inflation rate in prices. The index used to measure inflation is the non-seasonally adjusted U.S. Consumer Price Index for All Urban Consumers ("CPI-U").

The value of the principal is adjusted for inflation, and every six months the security pays interest, which is an amount equal to a fixed percentage of the inflation-adjusted value of the principal. The final payment of principal of the security will not be less than the original par amount of the security at issuance.

The principal of the inflation-protection security is indexed to the non-seasonally adjusted CPI-U. To calculate the inflation-adjusted principal value for a particular valuation date, the value of the principal at issuance is multiplied by the index ratio applicable to that valuation date. The index ratio for any date is the ratio of the reference Consumer Price Index ("CPI") applicable to such date to the reference CPI

applicable to the original issue date. Semi-annual coupon interest is determined by multiplying the inflation-adjusted principal amount by one-half of the stated rate of interest on each interest payment date.

Inflation-adjusted principal or the original par amount, whichever is larger, is paid on the maturity date as specified in the applicable offering announcement. If at maturity the inflation-adjusted principal is less than the original principal value of the security, an additional amount is paid at maturity so that the additional amount plus the inflation-adjusted principal equals the original principal amount. Some inflation-protection securities may be stripped into principal and interest components. In the case of a stripped security, the holder of the stripped principal component receives this additional amount. The final interest payment, however, is based on the final inflation-adjusted principal value, not the original par amount.

The reference CPI for the first day of any calendar month is the CPI-U for the third preceding calendar month. (For example, the reference CPI for December 1 is the CPI-U reported for September of the same year, which is released in October.) The reference CPI for any other day of the month is calculated by a linear interpolation between the reference CPI applicable to the first day of the month and the reference CPI applicable to the first day of the following month.

Any revisions the Bureau of Labor Statistics (or successor agency) makes to any CPI-U number that has been previously released will not be used in calculations of the value of outstanding inflation-protection securities. In the case that the CPI-U for a particular month is not reported by the last day of the following month, the Treasury will announce an index number based on the last year-over-year CPI-U inflation rate available. Any calculations of the Treasury's payment obligations on the inflation-protection security that need that month's CPI-U number will be based on the index number that the Treasury has announced. If the CPI-U is rebased to a different year, the Treasury will continue to use the CPI-U series based on the base reference period in effect when the security was first issued as long as that series continues to be published. If the CPI-U is discontinued during the period the inflation-protection security is outstanding, the Treasury will, in consultation with the Bureau of Labor Statistics (or successor agency), determine an appropriate substitute index and methodology for linking the discontinued series with the new price index series. Determinations of the Secretary of the Treasury in this regard are final.

Inflation-protection securities are held and transferred in either of two book-entry systems: the commercial book-entry system (TRADES) and TREASURY DIRECT. The securities are maintained and transferred at their original par amount, *i.e.*, not their inflation-adjusted value. The Federal Reserve program was established by the Treasury Department and is known as "STRIPS" or "Separate Trading of Registered Interest and Principal of Securities." STRIPS components are maintained and transferred in TRADES at their value based on their original par amount of the fully constituted security.

Variable Amount Master Demand Notes. The Funds may invest in variable amount master demand notes. Variable amount master demand notes are unsecured demand notes that permit the indebtedness thereunder to vary and provide for periodic adjustments in the interest rate according to the terms of the instrument. Because master demand notes are direct lending arrangements between a Fund and the issuer, they are not normally traded. Although there is no secondary market in the notes, a Fund may demand payment of principal and accrued interest at any time within 30 days. While such notes are not typically rated by credit rating agencies, issuers of variable amount master demand notes (which are normally manufacturing, retail, financial and other business concerns), must satisfy, for purchase by a Fund, the same criteria as set forth above for commercial paper for a Fund. The Adviser will consider the earning power, cash flow, and other liquidity ratios of the issuers of such notes and will continuously monitor their financial status and ability to meet payment on demand. In determining average weighted portfolio maturity, a variable amount master demand note will be deemed to have a maturity equal to the longer of the period of time remaining until the next interest rate adjustment or the period of time remaining until the principal amount can be recovered from the

issuer through demand.

Variable and Floating Rate Securities. The Funds may acquire variable and floating rate securities, subject to each Fund's investment objectives, policies and restrictions. A variable rate security is one whose terms provide for the adjustment of its interest rate on set dates and which, upon such adjustment, can reasonably be expected to have a market value that approximates its par value. A floating rate security is one whose terms provide for the adjustment of its interest rate whenever a specified interest rate changes and which, at any time, can reasonably be expected to have a market value that approximates its par value. Such securities are frequently not rated by credit rating agencies; however, unrated variable and floating rate securities purchased by a Fund will be determined by the Adviser, to be of comparable quality at the time of purchase to rated instruments eligible for purchase under a Fund's investment policies. In making such determinations, the Adviser will consider the earning power, cash flow and other liquidity ratios of the issuers of such notes (such issuers include financial, merchandising, bank holding and other companies) and will continuously monitor their financial condition. Although there may be no active secondary market with respect to a particular variable or floating rate security purchased by a Fund, the Fund may resell the security at any time to a third party. The absence of an active secondary market, however, could make it difficult for a Fund to dispose of a variable or floating rate security in the event the issuer of the security defaulted on its payment obligations and a Fund could, as a result or for other reasons, suffer a loss to the extent of the default. To the extent that there exists no readily available market for such security and a Fund is not entitled to receive the principal amount of a note within seven days, such a security will be treated as an illiquid security for purposes of calculation of such Fund's limitation on investments in illiquid securities, as set forth in a Fund's investment restrictions. Variable or floating rate securities may be secured by bank letters of credit.

Warrants. The Funds may invest in warrants to participate in an anticipated increase in the market value of the security. A warrant entitles the holder to buy a security at a set price during a set period of time. If such market value increases, the warrant may be exercised and sold at a gain. A loss will be incurred if the market value decreases or if the term of the warrant expires before it is exercised. Warrants convey no rights to dividends or voting.

When-Issued Securities. The Funds may purchase securities on a "when-issued" basis (*i.e.*, for delivery beyond the normal settlement date at a stated price and yield). When a Fund agrees to purchase securities on a "when-issued" basis, a Fund's custodian will set aside cash or liquid portfolio securities equal to the amount of the commitment in a separate account. Normally, a Fund's custodian will set aside portfolio securities to satisfy the purchase commitment, and in such a case, a Fund may be required subsequently to place additional assets in the separate account in order to assure that the value of the account remains equal to the amount of a Fund's commitment. It may be expected that a Fund's net assets will fluctuate to a greater degree when it sets aside portfolio securities to cover such purchase commitments than when it sets aside cash. In addition, because a Fund will set aside cash or liquid portfolio securities to satisfy its purchase commitments in the manner described above, such Fund's liquidity and the ability of the Adviser to manage it might be affected in the event its commitments to purchase "when-issued" securities ever exceeded 25% of the value of its total assets. Under normal market conditions, however, a Fund's commitment to purchase "when-issued" or "delayed-delivery" securities will not exceed 25% of the value of its total assets.

When a Fund engages in "when-issued" transactions, it relies on the seller to consummate the trade. Failure of the seller to do so may result in a Fund's incurring a loss or missing the opportunity to obtain a price considered to be advantageous. A Fund will engage in "when-issued" delivery transactions only for the purpose of acquiring portfolio securities consistent with such Fund's investment objectives and policies and not for investment leverage.

PORTFOLIO TURNOVER

The portfolio turnover rate for the Funds is calculated by dividing the lesser of purchases or sales of portfolio investments for the reporting period by the monthly average value of the portfolio investments owned during the reporting period. The calculation excludes all securities, including options, whose maturities or expiration dates at the time of acquisition are one year or less. Portfolio turnover may vary greatly from year to year as well as within a particular year, and may be affected by cash requirements for redemption of shares. The Funds are not restricted by policy with regard to portfolio turnover and will make changes in investment portfolios from time to time as business and economic conditions, as well as market prices, may dictate.

The following table displays the portfolio turnover rates for the Predecessor Funds for the fiscal years as shown below:

FUND	Portfolio Turnover Rates	
	April 30, 2023	April 30, 2022
Grandeur Peak Emerging Markets Opportunities Fund	32%	31%
Grandeur Peak Global Contrarian Fund	81%	50%
Grandeur Peak Global Explorer Fund	38%	8%
Grandeur Peak Global Micro Cap Fund	37%	36%
Grandeur Peak Global Opportunities Fund	28%	33%
Grandeur Peak Global Reach Fund	42%	42%
Grandeur Peak Global Stalwarts Fund	32%	49%
Grandeur Peak International Opportunities Fund	28%	26%
Grandeur Peak International Stalwarts Fund	32%	43%
Grandeur Peak US Stalwarts Fund	56%	31%

INVESTMENT RESTRICTIONS

Fundamental Investment Restrictions

The following is a description of the Funds' fundamental investment restrictions. "Fundamental" restrictions are those that may not be changed without the vote of a majority of a Fund's outstanding voting securities. Under the 1940 Act, the vote of a majority of the outstanding securities of a company means the vote, at the annual or a special meeting of the security holders of such company duly called: (A) of 67 percent or more of the voting securities present at such meeting, if the holders of more than 50 percent of the outstanding voting securities of such company are present or represented by proxy; or (B) of more than 50 percent of the outstanding voting securities of such company, whichever is less.

In contrast, non-fundamental investment restrictions (which include the Fund's investment objective and each of the other investment restrictions set forth in the Prospectus or this SAI) may be changed

by the Board without shareholder approval.

The percentages set forth below and the percentage limitations set forth in the Prospectus apply at the time of the purchase of a security and shall not be considered violated unless an excess or deficiency occurs or exists immediately after and as a result of a purchase of such security.

For purposes of the fundamental restrictions set forth below, “total assets” means net assets, plus the amount of any borrowings for investment purposes.

Each Fund may not:

1. Purchase or sell real estate, provided that the Funds may invest in securities secured by real estate or interests therein or issued by companies which invest in real estate or interests therein;
2. Purchase or sell physical commodities (including, by way of example and not by way of limitation, grains, oilseeds, livestock, meat, food, fiber, metals, petroleum, petroleum-based products or natural gas) or futures or options contracts with respect to physical commodities. This restriction shall not restrict the Funds from purchasing or selling any financial contracts or instruments which may be deemed commodities (including, by way of example and not by way of limitation, options, futures, and options on futures with respect, in each case, to interest rates, currencies, stock indexes, bond indexes or interest rate indexes) or any security which is collateralized or otherwise backed by physical commodities;
3. Make loans to other persons, except that each Fund may lend portfolio securities representing up to one-third of the value of its total assets. (The Funds, however, may purchase and hold debt instruments and enter into repurchase agreements in accordance with their investment objectives and policies.)
4. Underwrite securities of other issuers except insofar as the Funds may be deemed an underwriter under the Securities Act of 1933 in selling portfolio securities;
5. Invest more than 25% of total assets (taken at market value at the time of each investment) in the securities of issuers in any particular industry or group of industries;
6. Borrow money, except as permitted under the 1940 Act as interpreted or modified from time to time by any regulatory authority having jurisdiction; or
7. Issue senior securities, except as permitted under the 1940 Act, as interpreted or modified from time to time by any regulatory authority having jurisdiction.

Non-Fundamental Investment Restrictions

In addition to the foregoing fundamental investment policies, the Funds are also subject to the following non-fundamental restrictions and policies. These, and other non-fundamental investment restrictions disclosed elsewhere in the prospectus or in this statement of additional information may be changed at any time by the Board of Trustees without shareholder approval. For purposes of the non-fundamental restrictions set forth below, “total assets” means net assets, plus the amount of any borrowings for investment purposes.

Each Fund will not:

1. Make investments for the purpose of exercising control or management;
2. Invest in other investment companies except to the extent permitted by 1940 Act, rules and regulations thereunder and any exemptive relief granted by the SEC pursuant to which the Fund can rely;

3. Invest more than 15% of its net assets in all forms of illiquid investments, as determined pursuant to applicable SEC rules and interpretations;
4. Purchase or sell interests in oil, gas or other mineral exploration or development programs, although they may invest in the securities of issuers which invest in or sponsor such programs;
5. Invest more than 10% of its total assets (taken at market value at the time of each investment) in Special Situations, *i.e.*, companies in the process of reorganization or buy-out;
6. Engage in short sales of securities when these transactions would cause the market value of all of a Fund's securities sold short to exceed 15% of its net assets; or
7. Purchase securities on margin, except that the Fund may obtain such short-term credit as may be necessary for the clearance of transactions.

If any percentage restriction or requirement described above is satisfied at the time of investment, a later increase or decrease in such percentage resulting from a change in asset value will not constitute a violation of such restriction or requirement. However, should a change in net asset value or other external events cause a Fund's investments in illiquid securities, repurchase agreements with maturities in excess of seven days and other instruments in such Fund which are not readily marketable to exceed the limit set forth in such Fund's Prospectus or herein for its investment in illiquid securities, the Fund will act to cause the aggregate amount of such securities to come within such limit as soon as reasonably practicable.

Any investment restriction or limitation, fundamental or otherwise, appearing in the Prospectus or SAI, which involves a maximum percentage of securities or assets shall not be considered to be violated unless an excess over the percentage occurs immediately after an acquisition of securities or utilization of assets, and such excess results therefrom.

INVESTMENT ADVISER

Grandeur Peak Global Advisors, LLC (the "Adviser" or "Grandeur Peak Global Advisors"), subject to the authority of the Trust's Board of Trustees, is responsible for the overall management and administration of the Funds' business affairs. The Adviser commenced business operations in July 2011 and is registered with the Securities and Exchange Commission as an investment adviser. The Adviser's principal address is 136 South Main Street, Suite 720, Salt Lake City, Utah 84101. The Adviser also served as investment manager to the Predecessor Funds prior to the Reorganization.

Pursuant to the Investment Advisory Agreement (the "Advisory Agreement"), each Fund pays the adviser an annual management fee based on the Fund's average daily net assets as set forth in the table below:

<i>Fund</i>	<i>Advisory Fee (as a percentage of daily net assets)</i>
Grandeur Peak Global Opportunities Fund	1.25%
Grandeur Peak International Opportunities Fund	1.25%
Grandeur Peak Emerging Markets Opportunities Fund	1.35%

Grandeur Peak Global Reach Fund	1.10%
Grandeur Peak Global Stalwarts Fund	0.80%
Grandeur Peak International Stalwarts Fund	0.80%
Grandeur Peak Global Micro Cap Fund	1.50%
Grandeur Peak Global Contrarian Fund	1.00%
Grandeur Peak US Stalwarts Fund	0.75%
Grandeur Peak Global Explorer Fund	1.10%

The management fee is paid on a monthly basis. The initial term of the Advisory Agreement for the Funds is two years. The Board may extend the Advisory Agreement for additional one-year terms. The Board, shareholders of the Funds or the Adviser may terminate the Advisory Agreement upon sixty (60) days' notice. A discussion regarding the basis for the Board's approval of the Advisory Agreement will be provided in the Funds' report to shareholders for the fiscal period ended October 31, 2023.

The tables below show the management fees paid by each Predecessor Fund to the Grandeur Peak Global Advisors, LLC, in its capacity as investment manager to the Predecessor Funds, for the periods indicated:

Fund	For the Fiscal Year Ended April 30, 2023				
	Gross Advisory Fees	Waiver of Advisory Fees	Reimbursement of Other Expenses	Recoupment of Waived Fees	Net Advisory Fees
Grandeur Peak Emerging Markets Opportunities Fund	\$5,813,986	(\$109,699)	-	\$118,284	\$5,704,287
Grandeur Peak Global Contrarian Fund	\$1,014,100	-	-	-	\$1,014,100
Grandeur Peak Global Explorer Fund*	\$112,513	(\$112,513)	-	-	-
Grandeur Peak Global Micro Cap Fund	\$708,750	-	-	-	\$708,750
Grandeur Peak Global Opportunities Fund	\$8,434,275	(\$436,855)	-	-	\$7,997,420
Grandeur Peak Global Reach Fund	\$3,027,492	(\$28,389)	-	\$4,693	\$2,999,103
Grandeur	\$2,009,327	-	-	-	\$2,009,327

Peak Global Stalwarts Fund					
Grandeur Peak International Opportunities Fund	\$7,967,832	(\$343,566)	-	-	\$7,624,266
Grandeur Peak International Stalwarts Fund	\$12,535,201	-	-	-	\$12,535,201
Grandeur Peak US Stalwarts Fund	\$839,760	-	-	-	\$839,760

* The Grandeur Peak Global Explorer Fund commenced operations on December 15, 2021.

	For the Fiscal Year Ended April 30, 2022				
Fund	Gross Advisory Fees	Waiver of Advisory Fees	Reimbursement of Other Expenses	Recoupment of Waived Fees	Net Advisory Fees
Grandeur Peak Emerging Markets Opportunities Fund	\$8,536,389	(\$813,138)	-	-	\$7,723,251

Grandeur Peak US Stalwarts Fund	\$332,677	(\$49,676)	-	-	\$283,001

As described in the Prospectus under “Fees and Expenses,” in certain cases the Adviser has contractually agreed to limit certain of each Fund’s expenses (excluding acquired fund fees and expenses, brokerage expenses, interest expenses, taxes and extraordinary expenses) for each of the Funds.

With respect to the Institutional Class of the Grandeur Peak Global Contrarian Fund and the Grandeur Peak Global Explorer Fund, to the extent the Total Annual Fund Operating Expenses (exclusive of acquired fund fees and expenses, brokerage expenses, interest expense, taxes and extraordinary expenses) exceed the amounts listed below based on the Funds’ average daily net assets through October 6, 2024, the Adviser will reduce the fee payable with respect to the applicable Fund to the extent of such excess, and/or shall reimburse the applicable Fund (or class as applicable) by the amount of such excess.

Grandeur Peak Global Contrarian Fund	1.35%
Grandeur Peak Global Explorer Fund	1.25%

The Adviser will be permitted to recapture expenses it has borne through the previous sections of this letter agreement to the extent that a Fund’s expenses in later periods fall below the annual rates set forth in this letter agreement or in previous letter agreements; provided, however, that such recapture payments do not cause the Fund’s expense ratio (after recapture) to exceed the lesser of (i) the expense cap in effect at the time of the waiver and (ii) the expense cap in effect at the time of the recapture. Notwithstanding the foregoing, the Funds will not pay any such deferred fees and expenses more than three years after the date on which the fee and expenses were deferred. The Expense Agreement may not be terminated or modified prior to October 6, 2024, except with the approval of the Fund’s Board of Trustees.

The Adviser has also agreed to waive, with respect to each following fund, annual management fees to the extent the assets of such fund exceed the average daily net asset level specified below:

Fund	Management Fee with Waiver Applied	Applicable to Average Daily Net Assets
Grandeur Peak Global Opportunities Fund	1.00% (contractually 1.25%)	Above \$500 million
Grandeur Peak International Opportunities Fund	1.00% (contractually 1.25%)	Above \$500 million
Grandeur Peak Emerging Markets Opportunities Fund	1.00% (contractually 1.35%)	Above \$400 million

This waiver of management fees is not subject to recapture by the Adviser. Such fee waivers and reimbursements for the Funds shall continue at least through October 6, 2024. These fee waivers may not be terminated or modified prior to October 6, 2024, except with the approval of the Fund's Board of Trustees.

Under the terms of the Advisory Agreement, the Adviser shall not be liable for losses or damages incurred by the Funds, unless such losses or damages are attributable to the willful misfeasance, bad faith or gross negligence on the part of the Adviser or from reckless disregard by it of its obligations and duties under the Advisory Agreement ("disabling conduct"). In addition, the Funds will indemnify the Adviser and its affiliates and hold each of them harmless against any losses or damages not resulting from disabling conduct.

PORTFOLIO MANAGERS

The following sections set forth certain additional information with respect to the portfolio managers for the Funds. Unless noted otherwise, all information is provided as of August 31, 2023.

Other Accounts Managed by Portfolio Managers

The table below identifies as of August 31, 2023, for the portfolio managers of each Fund, the number of accounts (other than the Funds with respect to which information is provided) for which they have day-to-day management responsibilities and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles, and other accounts.

Portfolio Managers	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number	Total Assets (in millions)	Number	Total Assets (in millions)	Number	Total Assets (in millions)

Tyler Glauser	0	\$-	0	\$-	0	\$-

Portfolio Manager Compensation

Compensation. The elements of total compensation for the portfolio managers are base salary, performance-based bonus, profit sharing and other benefits. The Adviser has balanced the components of pay to provide portfolio managers with an incentive to focus on both shorter- and longer-term performance. By design, portfolio manager compensation levels will fluctuate — both up and down — with the relative investment performance of the Funds that they manage.

- **Base Salary.** Each portfolio manager is paid a fixed base salary.
- **Performance-Based Bonus.** A large portion of a portfolio manager’s potential compensation is in the form of a performance-based bonus. The majority of the performance-based bonus is tied to the pre-tax performance of the Fund(s) s/he manages based on the relevant Fund’s Morningstar (or other, where relevant) peer group ranking and the Fund’s performance versus the primary benchmark for the relative time period (typically 1-year and 3-years periods when available). Generally, maximum bonus is paid for top quartile peer performance and zero bonus is paid for anything below median performance, with prorated amounts paid between median and top quartile. Similarly, generally maximum bonus is paid for beating the primary benchmark by 400bps and zero bonus is paid for performance below the benchmark return, with prorated amounts paid for performance in between. Portfolio managers may receive a performance bonus based on firm performance across strategies within the industry and/or geography for which they are responsible, team performance bonus based on the profitability of the firm, performance of their individual stock selections, and overall performance of the research team.
- **Profit Sharing.** The portfolio managers are generally equity or synthetic equity partners in the firm. As such, they will share meaningfully in the firm’s profits.
- **Other Benefits.** Portfolio managers are also eligible to participate in broad-based plans offered generally to the Adviser’s full-time employees, including health insurance and other employee benefit plans.

Conflicts of Interest with Other Accounts. There may be certain inherent conflicts of interest that arise in connection with a portfolio manager’s management of the respective Fund’s investments and the investments of any other fund or client accounts the Adviser or the respective Fund’s individual team members also manage. Such conflicts include allocation of investment opportunities among the Funds and other accounts managed by the Adviser or the portfolio managers; the aggregation of purchase and sale orders believed to be in the best interest of more than one account managed by the Adviser or the portfolio managers and the allocation of such orders across such accounts; and any soft

dollar arrangements that the Adviser may have in place that could benefit a Fund and/or other accounts. Additionally, some funds or accounts managed by a portfolio manager may have different fee structures, including performance fees, which are, or have the potential to be, higher or lower than the fees paid by another fund or account. To minimize the effects of these inherent conflicts of interest, the Adviser has adopted and implemented policies and procedures, including trade aggregation and allocation procedures, that it believes are reasonably designed to mitigate the potential conflicts associated with managing portfolios for multiple clients, including the Funds, and seeks to ensure that no one client is intentionally favored at the expense of another. These policies and procedures are discussed in more detail under the section entitled “Brokerage Allocation and Other Practices” of this SAI.

Ownership of Securities

The table below identifies ownership of Fund securities by Robert Gardiner, the Adviser’s Chairman, and each Portfolio Manager as of August 31, 2023.

Highlighted cells represent that a particular individual serves as a portfolio manager for the Fund.

	Robert Gardiner (Chairman)	Blake Walker	Randy Pearce	Amy Hu Sunderland	Liping Cai	Mark Madsen

ALLOCATION OF BROKERAGE

Investment Decisions and Portfolio Transactions

Investment decisions for a Fund are made with a view to achieving its investment objectives. Investment decisions are the product of many factors in addition to basic suitability for the particular client involved (including the Fund). Some securities considered for investment by a Fund may also be appropriate for other clients served by the Adviser. Thus, a particular security may be bought or sold for certain clients even though it could have been bought or sold for other clients at the same time. If a purchase or sale of securities consistent with the investment policies of a Fund and one or more of these clients is considered at or about the same time, transactions in such securities will be allocated among the Fund and clients in a manner deemed fair and reasonable by the Adviser. Particularly when investing in less liquid or illiquid securities of smaller capitalization companies, such allocation may take into account the asset size of the Fund in determining whether the allocation of an investment is suitable. The Adviser may aggregate orders for each of the Fund with simultaneous transactions entered into on behalf of its other clients so long as price and transaction expenses are averaged either for the portfolio transaction or for that day. Likewise, a particular security may be bought for one or more clients when one or more clients are selling the security. In some instances, one client may sell a particular security to another client. It also sometimes happens that two or more clients simultaneously purchase or sell the same security, in which event each day's transactions in such security are, insofar as possible, averaged as to price and allocated between such clients in a manner which in the Adviser's opinion is equitable to each and in accordance with the amount being purchased or sold by each. There may be circumstances when purchases or sales of portfolio securities for one or more clients will have an adverse effect on other clients, including the Funds.

Brokerage Allocation and Other Practices

The Adviser places orders for the purchase and sale of portfolio securities, options and futures contracts and buys and sells such securities, options and futures for each Fund through a substantial number of brokers and dealers. In so doing, the Adviser uses its best efforts to obtain for each Fund the most favorable price and execution available, except to the extent it may be permitted to pay higher brokerage commissions as described below. In seeking the most favorable price and execution, the Adviser, having in mind the Fund's best interests, considers all factors it deems relevant, including, by

way of illustration, price, the size of the transaction, the nature of the market for the security, the amount of the commission, the timing of the transaction taking into account market prices and trends, the reputation, experience and financial stability of the broker-dealer involved and the quality of service rendered by the broker-dealer in that or other transactions.

The Adviser places orders for the purchase and sale of portfolio investments for each Fund's accounts with brokers or dealers selected by it in its discretion. The Adviser is responsible for negotiating and determining any commission rates to be paid for such transactions. The Adviser has no affiliated broker-dealer. In effecting purchases and sales of portfolio securities for the accounts of the Fund, the Adviser will seek the best price and execution of a Fund's orders. In doing so, the Fund may pay higher commission rates than the lowest available when the Adviser believes it is reasonable to do so in light of the value of the brokerage and research services provided by the broker effecting the transaction, as discussed below. Although a Fund may use a broker-dealer that sells Fund shares to effect transactions for the Fund's portfolios, the Fund will not consider the sale of Fund shares as a factor when selecting broker-dealers to execute those transactions.

There is generally no stated commission in the case of fixed-income securities and other securities traded on a principal basis in the over-the-counter markets, but the price paid by a Fund usually includes an undisclosed dealer commission or markup. In underwritten offerings, the price paid by the Fund includes a disclosed, fixed commission or discount retained by the underwriter or dealer. Transactions on U.S. stock exchanges and other agency transactions involve the payment by the Fund of negotiated brokerage commissions. Such commissions vary among different brokers. Also, a particular broker may charge different commissions according to such factors as the difficulty and size of the transaction. Transactions in non-U.S. securities generally involve the payment of fixed brokerage commissions, which are generally higher than those in the United States. The purchase by a Fund of participations or assignments may be pursuant to privately negotiated transactions pursuant to which the Fund may be required to pay fees to the seller or forego a portion of payments in respect of the participation agreement.

Advisers or sub-advisers of investment companies and other institutional investors receive research and brokerage products and services (together, "services") from broker-dealers which execute portfolio transactions for the clients of such advisers. Consistent with this practice, the Adviser receives brokerage and research products and services from many broker-dealers with which the Adviser places the Funds' portfolio transactions. These services, which in some cases may also be purchased for cash, may include, among other things, such items as general economic and security market reviews, industry and company reviews, evaluations of securities, recommendations as to the purchase and sale of securities, and services related to the execution of securities transactions. The advisory fees paid by the Funds are not reduced because the Adviser receives such services even though the receipt of such services relieves the Adviser from expenses it might otherwise bear. Research and brokerage services provided by broker-dealers chosen by the Adviser to place a Fund's portfolio transactions may be useful to the Adviser in providing services to the Adviser's other clients, although not all of these services may be necessarily useful and of value to the Adviser in managing the Fund. Conversely, brokerage and research products and services provided to the Adviser by broker-dealers in connection with trades executed on behalf of other clients of the Adviser may be useful to the Adviser in managing a Fund, although not all of these brokerage and research products and services may be necessarily useful and of value to the Adviser in managing such other clients.

The Trust's Board of Trustees has authorized the Adviser to pay a broker who provides research services commissions that are competitive but that are higher than the lowest available rate that another broker might have charged if the Adviser determines in good faith that the commissions are reasonable in relation to the value of the brokerage and research services provided. The provision of such services in exchange for brokerage business is commonly referred to as "soft-dollar arrangements." Payment of higher commissions in exchange for research services will be made in compliance with the provisions

of Section 28(e) of the Securities Exchange Act of 1934 (the "1934 Act") and other applicable state and federal laws. Section 28(e) of the 1934 Act defines "research" as, among other things, advice, directly or through publications or writings, as to the value of securities, the advisability of investing in, purchasing, or selling securities, and the availability of securities or purchasers or sellers of securities; and analyses and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy and the performance of accounts. Research products and services provided to the Adviser by broker-dealers may include, among other things, databases, data services, certain software and publications that provide access to and/or analysis of company, market and statistical data and proprietary research and analysis. In addition, the Adviser may receive certain products and services which provide both research and non-research or administrative assistance ("mixed-use") benefits, for example, software which is used for both portfolio analysis and account administration. In these instances, the Adviser makes a reasonable allocation as follows: the portion of such service of specific component which provides assistance to Adviser in its investment decision-making responsibilities is obtained from the broker-dealer with commissions paid on client portfolio transactions (including the Funds), while the portion of such services or specific component which provides non-research assistance is paid by the Adviser with its own resources.

The Adviser places portfolio transactions for other advisory accounts. Research services furnished by firms through which the Trust effects its securities transactions may be used by the Adviser in servicing all of its accounts; not all of such services may be used by the Adviser in connection with the Trust. In the opinion of the Adviser, the benefits from research services to each of the accounts (including the Funds) managed by the Adviser cannot be measured separately. Because the volume and nature of the trading activities of the accounts are not uniform, the amount of commissions in excess of the lowest available rate paid by each account for brokerage and research services will vary. However, in the opinion of the Adviser, such costs to the Trust will not be disproportionate to the benefits received by the Trust on a continuing basis.

The Adviser may place orders for the purchase and sale of exchange-listed portfolio securities with a broker-dealer that is an affiliate of the Adviser where, in the judgment of the Adviser, such firm will be able to obtain a price and execution at least as favorable as other qualified broker-dealers. Pursuant to rules of the SEC, a broker-dealer that is an affiliate of the Adviser may receive and retain compensation for effecting portfolio transactions for the Funds on a securities exchange if the commissions paid to such an affiliated broker-dealer by the Funds on exchange transactions do not exceed "usual and customary brokerage commissions." The rules define "usual and customary" commissions to include amounts which are "reasonable and fair compared to the commission, fee or other remuneration received or to be received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time." As required by applicable SEC rules, the Board has adopted procedures which are reasonably designed to provide that any commissions, fees or other remuneration paid to an affiliated broker are consistent with the foregoing standards.

The brokerage practices are monitored quarterly by the Board of Trustees including the Trustees that are disinterested persons (as defined in the 1940 Act) of the Funds.

During 2002 there was a shift in the brokerage industry toward trading securities in the over-the-counter market on agency or commission-equivalent basis rather than on a principal or net price basis. Over-the-counter ("OTC") purchases and sales may be transacted directly with principal market makers or, under circumstances, on an agency basis if the Adviser believes that the interests of clients are best served by using a broker to execute OTC transactions where one or more market makers may not have the necessary liquidity and/or anonymity to fill the order. When the Adviser elects to transact in OTC securities on an agency basis, two transaction costs for a single trade may be incurred: a commission paid to the executing broker-dealer plus any mark-up or mark-down charged by the market making broker-dealer. The Funds also expect that securities will be purchased at times in underwritten offerings

where the price includes a fixed amount of compensation, usually referred to as the underwriter's concessions or discount. On occasion, purchases may also be made from the issuers. Purchases of new issues from underwriters of securities typically include a commission or concession paid by the issuer to the underwriter.

Aggregation and Allocation of Trades

If the Adviser believes that the purchase or sale of a security is in the best interest of more than one of its clients (including the Funds), the Adviser may aggregate the securities to be purchased or sold to obtain favorable execution and/or lower brokerage commissions. In certain foreign markets, aggregation may occur at the broker level at the instruction of the Adviser. If an aggregate order is partially filled, the Adviser will allocate securities so purchased or sold, as well as the expense incurred in the transaction, on a pro-rata basis or in another manner it considers to be equitable and consistent with its fiduciary obligations to its clients. Conflicts may arise in the allocation of investment opportunities among accounts (including the Funds) that the Adviser advises. The Adviser will seek to allocate investment opportunities believed appropriate for one or more of its accounts equitably and consistent with the best interests of all accounts involved; however, there can be no assurance that a particular investment opportunity that comes to the Adviser's attention will be allocated in any particular manner. The Adviser will create an allocation statement prior to executing a block trade, typically using a rounding factor such as 25 or 100 shares. Accordingly, each order should state the accounts that will participate in any block trade and the intended allocation of the order among those accounts.

When an allocation statement is prepared:

(1) If a block trade is filled in its entirety, the shares must generally be allocated in accordance with the allocation specified in the order.

(2) If a block trade is partially filled, the shares are allocated using one of the methods below. In these situations, some Funds/Clients may receive their entire allocation and some Funds/Clients may not receive any allocation if their allocation is less than a de minimis amount.

- Pro-Rata allocates shares based on the ratio of the filled shares to the order's target. For example, if 50% of an order is filled, each Fund/Client gets 50% of the target. This means that larger accounts will get more shares. The pro-rata method may be used when there are no special considerations for distribution.
- Leveling distributes shares so that each Fund's/Client's current actual percent position is equal. Leveling may be used to bring all accounts to a certain percentage of portfolio market value in a security. This means the accounts the farthest away from a target weight will receive a higher percentage of its pre-allocation shares than accounts closer to their target weights.
- Random allocates shares by randomly selecting Funds/Clients and filling their targets until no shares are left. Random may be used when there is a large block with a small fill. By using the random method, a small portion would not be assigned to each Fund/Client.
- Sequential fills each Fund's/Client's target based on portfolio detail (e.g., cash), and then moves on to the next Fund/Client until no shares are left. For example, if sequential is used when a buy order is partially filled and the first sort is based on cash, the Fund/Clients with the most cash will be allocated shares first.

It is understood that circumstances may arise which make pre-execution allocations impossible. Trades that are not allocated pre-execution will be allocated no later than the close of business on the trade date. All Funds/Clients must be fairly and equitably treated by any post-execution allocation of a trade.

From time to time, the Adviser is given the opportunity to purchase an allocation of shares in an initial public offering (“IPO”). These allocations may be offered to the Adviser in part as a result of its past usage of various brokerage firms or previous private investments. If the aggregate order is partially filled, the Adviser will generally allocate securities purchased in these offerings to client accounts (including the Funds) within the designated investment style(s) for which the security is best suited using a leveling or other method believed equitable by it, unless the total allocation to the Adviser or a particular investment style is de minimis.

Certain conflicts of interest may arise related to aggregated transactions. The Adviser will report to the Board of Trustees of the Funds the existence of all of the relevant facts relating to any material conflicts of interest between the Adviser, its other advisory accounts and the Funds in any aggregated transaction to allow the independent trustees to approve or ratify the mutual fund’s participation in the aggregated transaction, before or after the transaction. The Board of Trustees has approved written trade aggregation policies and procedures that seek to ensure that aggregated transactions are made in a manner that is fair and equitable to, and in the best interests of, the various funds and accounts. The Board of Trustees, in conjunction with the Adviser, will review the trade aggregation policies and procedures no less frequently than annually to seek to ensure that they are adequate to prevent any Fund from being systematically disadvantaged as a result of the aggregated transactions.

The following table lists the total amount of brokerage commissions paid by each Predecessor Fund for the fiscal period noted:

Fund Name	For the Fiscal Year Ended April 30, 2023	For the Fiscal Year Ended April 30, 2022	For the Fiscal Year Ended April 30, 2021
Grandeur Peak Emerging Markets Opportunities Fund	\$322,665	\$474,690	\$372,568
Grandeur Peak Global Contrarian Fund	\$212,900	\$137,286	\$50,273
Grandeur Peak Global Explorer Fund*	\$10,191	\$6,843	-
Grandeur Peak Global Opportunities Fund	\$321,958	\$430,053	\$511,688
Grandeur Peak Global Reach Fund	\$216,760	\$214,869	\$192,899
Grandeur Peak Global Micro Cap Fund	\$33,192	\$44,793	\$44,217
Grandeur Peak Global Stalwarts Fund	\$167,934	\$216,732	\$198,407
Grandeur Peak International Opportunities Fund	\$305,974	\$397,729	\$464,907
Grandeur Peak International Stalwarts Fund	\$899,621	\$1,117,989	\$1,093,921
Grandeur Peak US Stalwarts Fund	\$66,201	\$35,704	\$42,585

*The Grandeur Peak Global Explorer Predecessor Fund commenced operations on December 15, 2021

For the fiscal years ended April 30, 2023, April 30, 2022, and April 30, 2021, no Predecessor Fund had any transactions identified for execution primarily on the basis of research and other services provided to each Predecessor Fund and therefore no related commissions.

The following tables list the total amount of brokerage commissions to brokers who were affiliated with the Predecessor Funds or the Adviser during the fiscal period noted below:

Fund Name	For the Fiscal Year Ended April 30, 2023	For the Fiscal Year Ended April 30, 2022	For the Fiscal Year Ended April 30, 2021

POLICIES AND PROCEDURES FOR DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust has adopted policies and procedures that govern the disclosure of the Funds' portfolio holdings. These policies and procedures are designed to ensure that such disclosure is in the best interests of the Funds' shareholders.

It is the Trust's policy to: (1) ensure that any disclosure of portfolio holdings information is in the best interest of Trust shareholders; (2) protect the confidentiality of portfolio holdings information; (3) have procedures in place to guard against personal trading based on the information; and (4) ensure that the disclosure of portfolio holdings information does not create conflicts between the interests of the Trust's shareholders and those of the Trust's affiliates.

The Funds disclose their portfolio holdings by mailing the annual and semi-annual reports to shareholders approximately two months after the end of the fiscal year and semi-annual period. In addition, the Funds disclose their portfolio holdings reports on Forms N-CSR two months after the end of each quarter/semi-annual period and on Form N-PORT 60 days after the end of each fiscal quarter.

Under limited circumstances, as described below, the Funds' portfolio holdings may be disclosed to, or known by, certain third parties in advance of their filing with the SEC on Form N-CSR or Form N-PORT. In each case, a determination has been made by the Trust's Chief Compliance Officer that such advance disclosure is supported by a legitimate business purpose of the Funds and that the recipient is subject to a duty to keep the information confidential and not trade on material non-public information.

Grandeur Peak Global Advisors, LLC. Personnel of the Adviser, including personnel responsible for managing each Fund's portfolio, may have full daily access to the Funds' portfolio holdings since that information is necessary in order for them to provide management, administrative, and investment services to the Funds. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, demand and liquidity of such securities, as well as for the assistance of portfolio manager in the trading of such securities, Adviser personnel may also release and discuss certain portfolio holdings with various broker-dealers.

Ultimus Fund Solutions, LLC. Ultimus Fund Solutions, LLC is the transfer agent, fund accountant, administrator and custody administrator for the Funds; therefore, its personnel have full daily access to the Funds' portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Brown Brothers Harriman & Co.. Brown Brothers Harriman & Co. is custodian for the Funds; therefore, its personnel have full daily access to the Funds' portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Deloitte & Touche LLP. Deloitte & Touche LLP is the Funds' independent registered public accounting firm; therefore, its personnel have access to the Funds' portfolio holdings in connection with auditing of the Funds' annual financial statements and providing other audit, tax and related services for the Funds.

Counsel to the Trust and Counsel to the Independent Trustees. Counsel to the Trust, Counsel to the Independent Trustees and their respective personnel have access to the Funds' portfolio holdings in connection with the review of the Funds' annual and semi-annual shareholder reports and SEC filings.

Additions to List of Approved Recipients

The Trust's or Adviser's Chief Compliance Officer is the person responsible, and whose prior approval is required, for any disclosure of the Funds' portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information in connection with the operation or administration of the Funds, as determined by the Trust's or Adviser's Chief Compliance Officer and must be subject to a duty to keep the information confidential and not trade on any material non-public information. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall the Funds, the Adviser, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Funds' portfolio holdings.

Compliance With Portfolio Holdings Disclosure Procedures

The Trust's Chief Compliance Officer will report periodically to the Board with respect to compliance with the Funds' portfolio holdings disclosure procedures, and from time to time will provide the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust's policies on disclosure of portfolio holdings will protect the Funds from the potential misuse of holdings information by individuals or firms in possession of that information.

OTHER SERVICE PROVIDERS

Fund Administration, Fund Accounting and Transfer Agent Services

Ultimus Fund Solutions, LLC (the "Administrator" or "UFS"), which has its principal office at 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246, serves as administrator, fund accountant and transfer agent for the Funds pursuant to a Fund Services Agreement (the "Agreement") with the Trust and subject to the supervision of the Board. UFS is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds. UFS is an affiliate of the Distributor. UFS may also provide persons to serve as officers of the Funds. Such officers may be directors, officers or employees of UFS or its affiliates.

The Agreement became effective on February 23, 2023 and will remain in effect for five years from the effective date, and will continue in effect for successive twelve-month periods provided that such continuance is specifically approved at least annually by a majority of the Board. The Agreement is terminable by the Board or UFS on 90 days' written notice and may be assigned by either party, provided that the Trust may not assign this agreement without the prior written consent of UFS. The Agreement provides that UFS shall be without liability for any action reasonably taken or omitted pursuant to the Agreement.

Under the Agreement, UFS performs administrative services, including: (1) monitoring the performance of administrative and professional services rendered to the Trust by others service providers; (2) monitoring Fund holdings and operations for post-trade compliance with the Funds' registration statement and applicable laws and rules; (3) preparing and coordinating the printing of semi-annual and annual financial statements; (4) preparing selected management reports for performance and compliance analyses; (5) preparing and disseminating materials for and attending and participating in meetings of the Board; (6) determining income and capital gains available for distribution and calculating distributions required to meet regulatory, income, and excise tax requirements; (7) reviewing the Trust's federal, state, and local tax returns as prepared and signed by the Trust's independent public accountants; (8) preparing and maintaining the Trust's operating expense budget to determine proper expense accruals to be charged to each Fund to calculate its daily NAV; (9) assisting in and monitoring the preparation, filing, printing and where applicable, dissemination to shareholders of amendments to the Trust's Registration Statement on Form N-1A, periodic reports to the Trustees, shareholders and the SEC, notices pursuant to Rule 24f-2, proxy materials and reports to the SEC on Forms N-CEN, N-CSR, N-PORT and N-PX; (10) coordinating the Trust's audits and examinations by assisting each Fund's independent public accountants; (11) determining, in consultation with others, the jurisdictions in which shares of the Trust shall be registered or qualified for sale and facilitate such registration or qualification; (12) monitoring sales of shares and ensuring that the shares are properly and duly registered with the SEC; (13) monitoring the calculation of performance data for the Funds; (14) preparing, or causing to be prepared, expense and financial

reports; (15) preparing authorization for the payment of Trust expenses and paying, from Trust assets, all bills of the Trust; (16) providing information typically supplied in the Investment Company industry to companies that track or report price, performance or other information with respect to investment companies; (17) upon request, assisting each Fund in the evaluation and selection of other service providers, such as independent public accountants, printers, EDGAR providers and proxy solicitors (such parties may be affiliates of UFS); and (18) performing other services, recordkeeping and assistance relating to the affairs of the Trust as the Trust may, from time to time, reasonably request.

UFS also provides the Funds' with accounting services, including: (i) daily computation of NAV; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of the Fund's listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for the Fund; (vi) maintenance of certain books and records described in Rule 31a-1 under the 1940 Act, and reconciliation of account information and balances among the Custodian and Adviser; and (vii) monitoring and evaluation of daily income and expense accruals, and sales and redemptions of shares of the Funds.

UFS also acts as transfer, dividend disbursing, and shareholder servicing agent for each Fund pursuant to the Agreement. Under the Agreement, UFS is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations.

For the services rendered to each Fund under the Agreement the Funds pay UFS the greater of an annual minimum fee or an asset-based fee, which scales downward based upon net assets. Each Fund also pays UFS for any out-of-pocket expenses.

Both the Funds and the Trust are new and thus information about the compensation paid to UFS by the Trust for its most recent fiscal year is not available.

Custodian

Brown Brothers Harriman & Co., located at 40 Water Street, Boston, Massachusetts 02109 (the "Custodian"), serves as the custodian of the Funds' assets pursuant to a custody agreement (the "Custody Agreement") by and between the Custodian and the Trust on behalf of the Funds. The Custodian's responsibilities include safeguarding and controlling the Funds' cash and securities, handling the receipt and delivery of securities, and collecting interest and dividends on the Funds' investments. Pursuant to the Custody Agreement, the Custodian also maintains original entry documents and books of record and general ledgers; posts cash receipts and disbursements; and records purchases and sales based upon communications from the Adviser. The Funds may employ foreign sub-custodians that are approved by the Board to hold foreign assets.

Compliance Services

Northern Lights Compliance Services, LLC ("NLCS"), located at 4221 North 203rd Street, Suite 100, Elkhorn, Nebraska 68022, an affiliate of UFS and the Distributor, provides a Chief Compliance Officer to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. NLCS's compliance services consist primarily of reviewing and assessing the policies and procedures of the Trust and its service providers pertaining to compliance with applicable federal securities laws, including Rule 38a-1 under the 1940 Act. For the compliance services rendered to the Fund, the Fund pays NLCS a one-time fee plus an annual asset-based fee, which scales downward based upon net assets. The Fund also pays NLCS for any out-of-pocket expenses.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board has selected Deloitte & Touche LLP (“Deloitte”), located at 1601 Wewatta Street, Suite 400, Denver, Colorado 80202 as the Funds’ independent registered public accounting firm for the current fiscal year. The firm provides services including the annual audits of the Funds’ financial statements and other audit, tax and related services to the Funds.

LEGAL COUNSEL

Thompson Hine LLP, 41 South High Street, Suite 1700, Columbus, Ohio 43215 serves as the Trust’s legal counsel.

DISTRIBUTOR

Northern Lights Distributors, LLC, located at 4221 North 203rd Street, Suite 100, Elkhorn, Nebraska 68022 (the “Distributor”) serves as the principal underwriter and national distributor for the shares of the Funds pursuant to an underwriting agreement with the Trust (the “Underwriting Agreement”). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state’s securities laws and is a member of FINRA. The offering of the Funds’ shares are continuous. The Underwriting Agreement provides that the Distributor, as agent in connection with the distribution of Fund shares, will use reasonable efforts to facilitate the sale of the Funds’ shares.

The Underwriting Agreement provides that, unless sooner terminated, it will continue in effect for two years initially and thereafter shall continue from year to year, subject to annual approval by (a) the Board or a vote of a majority of the outstanding shares, and (b) by a majority of the Board by vote cast in person at a meeting called for the purpose of voting on such approval.

The Underwriting Agreement may be terminated by the Funds at any time, without the payment of any penalty, by vote of a majority of the entire Board or by vote of a majority of the outstanding shares of the Funds on 60 days’ written notice to the Distributor, or by the Distributor at any time, without the payment of any penalty, on 60 days’ written notice to the Funds. The Underwriting Agreement will automatically terminate in the event of its assignment.

Rule 12b-1 Plan (Investor Class Only)

As described in the Prospectus, each Fund has adopted a Rule 12b-1 plan for its Investor Class shares (the “Plan”). Pursuant to Rule 12b-1 under the 1940 Act, the Plan (together with the Distribution Agreement) were approved by the Trust’s Board, including a majority of the Trustees who are not interested persons of the Trust (as defined in the 1940 Act) and who have no direct or indirect financial interest in the operations of the Plan or the Distribution Agreement. The principal types of activities for which payments under the Plan may be made include payments relating to the distribution and marketing of Investor Class shares. The Trust believes that the Plan may benefit the Trust by increasing net sales of the Funds (or reducing net redemptions), potentially allowing the Funds to benefit from economies of scale.

Under the terms of the Plan, the Trust is authorized to make payments to the Distributor, as defined later in this SAI, for remittance to retirement plan service providers, broker-dealers, bank trust departments, financial advisors, and other financial intermediaries, as compensation for distribution and/or shareholder services performed by such entities for their customers who are investors in the

Fund. Financial intermediaries may from time to time be required to meet certain criteria in order to receive Rule 12b-1 fees. The Distributor is entitled to retain some or all fees payable under the Plan in certain circumstances (which may exceed actual expenses incurred), including when there is no broker of record or when certain qualification standards have not been met by the broker of record.

The Plan may be terminated by vote of a majority of the Independent Trustees, or by vote of a majority of the outstanding voting securities of the relevant class of shares of the Fund. The Plan may be amended by vote of the relevant Trustees, including a majority of the relevant Independent Trustees, cast in person at a meeting called for that purpose. Any change in the Plan that would materially increase the fees payable thereunder by the relevant class of shares of the Fund requires approval by a vote of the holders of a majority of such shares outstanding. The Trust's Trustees review quarterly a written report of such costs and the purposes for which such costs have been incurred.

The Plan will continue in effect for successive one-year periods, provided that each such continuance is specifically approved (i) by the vote of a majority of the Independent Trustees of the Trust who have no financial interest in the operation of the Plan and (ii) by the vote of a majority of the entire Board cast in person at a meeting called for that purpose.

Amounts Expensed Under the Rule 12b-1 Plan

For the fiscal year ended April 30, 2023, the total amounts paid by the Investor Class shares of each Predecessor Fund to their distributor (substantially all of which the distributor paid out as compensation to broker-dealers and other service providers) under the Investor Class Plan are summarized below.

	Advertising and Literature	Printing and Postage	Payment to Dealers	Compensation to Sales Personnel	Total 12b-1 Payments
Grandeur Peak Emerging Markets Opportunities Fund	-	-	\$18,549	-	\$29,222
Grandeur Peak Global Opportunities Fund	-	-	\$186,963	-	\$281,151
Grandeur Peak Global Reach Fund	-	-	\$59,152	-	\$126,442
Grandeur Peak Global Stalwarts Fund	-	-	\$100,816	-	\$237,783
Grandeur Peak International Opportunities Fund	-	-	\$80,238	-	\$134,410
Grandeur Peak International Stalwarts Fund	-	-	\$82,504	-	\$209,632

DESCRIPTION OF SHARES

Each share of beneficial interest of the Trust has one vote in the election of Trustees. Cumulative voting is not authorized for the Trust. This means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees if they choose to do so, and, in that event, the holders of the remaining shares will be unable to elect any Trustees.

Shareholders of the Trust and any other future series of the Trust will vote in the aggregate and not by series except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interest of the shareholders of a particular series or classes. Matters such as election of Trustees are not subject to separate voting requirements and may be acted upon by shareholders of the Trust voting without regard to series.

The Trust is authorized to issue an unlimited number of shares of beneficial interest. Each share has equal dividend, distribution and liquidation rights. There are no conversion or preemptive rights applicable to any shares of the Funds. All shares issued are fully paid and non-assessable.

CODE OF ETHICS

The Trust, the Adviser and the Distributor have each adopted codes of ethics under Rule 17j-1 under the 1940 Act that governs the personal securities transactions of their board members, officers and employees who may have access to current trading information of the Trust. Under the code of ethics adopted by the Trust, the Trustees are permitted to invest in securities that may also be purchased by the Funds.

In addition, the Trust has adopted a code of ethics, which applies only to the Trust's executive officers (the "Code") to ensure that these officers promote professional conduct in the practice of corporate governance and management. The purpose behind these guidelines is to promote (i) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships; (ii) full, fair, accurate, timely, and understandable disclosure in reports and documents that a registrant files with, or submits to, the SEC and in other public communications made by the Funds; (iii) compliance with applicable governmental laws, rule and regulations; (iv) the prompt internal reporting of violations of the Code to an appropriate person or persons identified in the Code; and (v) accountability for adherence to the Code.

PROXY VOTING POLICIES

The Board has adopted Proxy Voting Policies and Procedures ("Policies") on behalf of the Trust, which delegate the responsibility for voting proxies to the Adviser or its designee, subject to the Board's continuing oversight. The Policies require that the Adviser or its designee vote proxies received in a manner consistent with the best interests of the Funds and shareholders. The Policies also require the Adviser or its designee to present to the Board, at least annually, the Adviser's Proxy Policies, or the proxy policies of the Adviser's designee, and a record of each proxy voted by the Adviser or its designee on behalf of the Funds, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest. It is anticipated that the Adviser will vote all proxies that are received on the Funds' behalf.

Where a proxy proposal raises a material conflict between the Adviser's interests and the Funds' interests, the Adviser will resolve the conflict by voting in accordance with the policy guidelines or at the client's directive using the recommendation of an independent third party. If the third party's recommendations are not received in a timely fashion, the Adviser will abstain from voting the securities held by that client's account. A copy of the Adviser's proxy voting policies is attached hereto as Appendix B.

Information regarding how the Funds voted proxies during the most recent 12-month period ended June 30 is available without charge, upon request, by calling toll free, 855-377-PEAK(7235) and by accessing the information on proxy voting filed by the Funds on Form N-PX on the SEC's website at www.sec.gov. In addition, a copy of the Funds' proxy voting policies and procedures are also available by calling 855-377-PEAK(7235) and will be sent within three business days of receipt of a request.

PURCHASE, REDEMPTION AND PRICING OF FUND SHARES

Calculation of Share Price

As indicated in the Prospectus under the heading "How to Purchase Shares," the NAV of each Fund's shares, by class, is determined by dividing the total value of the Fund's portfolio investments and other

assets, less any liabilities, by the total number of shares outstanding of each Fund, by class, respectively.

Generally, the Funds' domestic securities (including underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges) are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the NASDAQ National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Adviser in accordance with procedures approved by the Board and as further described below. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market.

Certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to guidelines established by the Board, with reference to other securities or indices. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. Short-term debt obligations having 60 days or less remaining until maturity, at time of purchase, may be valued at amortized cost, which approximates fair value.

Exchange traded options are valued at the last quoted sales price or, in the absence of a sale, at the mean between the current bid and ask prices on the exchange on which such options are traded. Futures and options on futures are valued at the settlement price determined by the exchange. Other securities for which market quotes are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction. Swap agreements and other derivatives are generally valued daily based upon quotations from market makers or by a pricing service in accordance with the valuation procedures approved by the Board.

Under certain circumstances, the Funds may use an independent pricing service to calculate the fair market value of foreign equity securities on a daily basis by applying valuation factors to the last sale price or the mean price as noted above. The fair market values supplied by the independent pricing service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The independent pricing service will also take into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Fund shares are not priced, the value of securities held by the Funds can change on days when Fund shares cannot be redeemed or purchased. In the event that a foreign security's market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before the Funds' calculation of NAV), the security will be valued at its fair market value as determined in good faith by the Adviser in accordance with procedures approved by the Board as discussed below. Without fair valuation, it is possible that short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Funds' portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that it will prevent dilution of the Funds' NAV by short-term traders. In addition, because the Funds may

invest in underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of these portfolio securities may change on days when you may not be able to buy or sell Fund shares.

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services. As a result, the NAV of the Funds' shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange ("NYSE") is closed and an investor is not able to purchase, redeem or exchange shares.

Fund shares are valued at the close of regular trading on the NYSE (normally 4:00 p.m., Eastern time) (the "NYSE Close") on each day that the NYSE is open. For purposes of calculating the NAV, the Funds normally use pricing data for domestic equity securities received shortly after the NYSE Close and does not normally take into account trading, clearances or settlements that take place after the NYSE Close. Domestic fixed income and foreign securities are normally priced using data reflecting the earlier closing of the principal markets for those securities. Information that becomes known to the Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day.

When market quotations are insufficient or not readily available, the Funds may value securities at fair value or estimate their value as determined in good faith by the Board or its designee, pursuant to procedures approved by the Board. Fair valuation may also be used by the Board if extraordinary events occur after the close of the relevant market but prior to the NYSE Close.

The Funds may hold securities, such as private placements, interests in commodity pools, other non-traded securities or temporarily illiquid securities, for which market quotations are not readily available or are determined to be unreliable. These securities will be valued at their fair market value as determined using the "fair value" procedures approved by the Board. The Board has delegated execution of these procedures to the Adviser. The Adviser may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

Valuation Process. Fair value determinations are required for the following securities: (i) securities for which market quotations are insufficient or not readily available on a particular business day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source); (ii) securities for which, in the judgment of the Adviser, the prices or values available do not represent the fair value of the instrument. Factors which may cause the Adviser to make such a judgment include, but are not limited to, the following: only a bid price or an asked price is available; the spread between bid and asked prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading; (iii) securities determined to be illiquid; (iv) securities with respect to which an event that will affect the value thereof has occurred (a "significant event") since the closing prices were established on the principal exchange on which they are traded, but prior to the Funds' calculation of its NAV. Specifically, interests in commodity pools or managed futures pools are valued on a daily basis by reference to the closing market prices of each futures contract or other asset held by a pool, as adjusted for pool expenses. Restricted or illiquid securities, such as private placements or non-traded securities are valued via inputs from the Adviser valuation based upon the current bid for the security from two or more independent dealers or other parties reasonably familiar with the facts and

circumstances of the security (who should take into consideration all relevant factors as may be appropriate under the circumstances). If the Adviser is unable to obtain a current bid from such independent dealers or other independent parties, the fair value committee shall determine the fair value of such security using the following factors: (i) the type of security; (ii) the cost at date of purchase; (iii) the size and nature of the Funds' holdings; (iv) the discount from market value of unrestricted securities of the same class at the time of purchase and subsequent thereto; (v) information as to any transactions or offers with respect to the security; (vi) the nature and duration of restrictions on disposition of the security and the existence of any registration rights; (vii) how the yield of the security compares to similar securities of companies of similar or equal creditworthiness; (viii) the level of recent trades of similar or comparable securities; (ix) the liquidity characteristics of the security; (x) current market conditions; and (xi) the market value of any securities into which the security is convertible or exchangeable.

Standards For Fair Value Determinations. As a general principle, the fair value of a security is the amount that a Fund might reasonably expect to realize upon its current sale. The Trust has adopted Financial Accounting Standards Board Statement of Financial Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosures ("ASC 820"). In accordance with ASC 820, fair value is defined as the price that the Funds would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 establishes a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability, developed based on the best information available under the circumstances.

Various inputs are used in determining the value of each Fund's investments relating to ASC 820. These inputs are summarized in the three broad levels listed below.

Level 1 – quoted prices in active markets for identical securities.

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including a Fund's own assumptions in determining the fair value of investments).

The Adviser takes into account the relevant factors and surrounding circumstances, which may include: (i) the nature and pricing history (if any) of the security; (ii) whether any dealer quotations for the security are available; (iii) possible valuation methodologies that could be used to determine the fair value of the security; (iv) the recommendation of a portfolio manager of the Funds with respect to the valuation of the security; (v) whether the same or similar securities are held by other funds managed by the Adviser or other funds and the method used to price the security in those funds; (vi) the extent to which the fair value to be determined for the security will result from the use of data or formulae produced by independent third parties and (vii) the liquidity or illiquidity of the market for the security.

Board's Determination. The Board meets at least quarterly to consider the valuations provided by the Adviser and to ratify the valuations made for the applicable securities. The Board considers the reports provided by the fair value committee, including follow up studies of subsequent market-provided prices when available, in reviewing and determining in good faith the fair value of the applicable portfolio securities.

Purchase of Shares

Orders for shares received by the Funds in good order prior to the close of business on the NYSE on each day during such periods that the NYSE is open for trading are priced at the public offering price, which is NAV plus any sales charge, or at NAV per share (if no sales charges apply) computed as of the close of the regular session of trading on the NYSE. Orders received in good order after the close of the NYSE, or on a day it is not open for trading, are priced at the close of such NYSE on the next day on which it is open for trading at the next determined NAV per share plus sales charges, if any.

Redemption of Shares

The Funds redeem all or any portion of a shareholder's shares of the Funds when requested in accordance with the procedures set forth in the "How to Redeem Shares" section of the Prospectus. Under the 1940 Act, a shareholder's right to redeem shares and to receive payment therefore may be suspended at times:

(a) when the NYSE is closed, other than customary weekend and holiday closings; (b) when trading on that exchange is restricted for any reason; (c) when an emergency exists as a result of which disposal by the Funds of securities owned is not reasonably practicable or it is not reasonably practicable for the Funds to fairly determine the value of net assets, provided that applicable rules and regulations of the SEC (or any succeeding governmental authority) will govern as to whether the conditions prescribed in (b) or (c) exist; or (d) when the SEC by order permits a suspension of the right to redemption or a postponement of the date of payment on redemption.

In case of suspension of the right of redemption, payment of a redemption request will be made based on the NAV next determined after the termination of the suspension.

Supporting documents in addition to those listed under "How to Redeem Shares" in the Prospectus will be required from executors, administrators, trustees, or if redemption is requested by someone other than the shareholder of record. Such documents include, but are not restricted to, stock powers, trust instruments, certificates of death, appointments as executor, certificates of corporate authority and waiver of tax required in some states when settling estates.

TAX STATUS

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. All shareholders should consult a qualified tax adviser regarding their investment in the Funds.

The Funds intend to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "IRC"), which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, the Funds

should not be subject to federal income or excise tax on its net investment income or net capital gain, which are distributed to shareholders in accordance with the applicable timing requirements. Net investment income and net capital gain of the Funds will be computed in accordance with Section 852 of the IRC.

The Funds intend to distribute all of their net investment income, any excess of net short-term capital gains over net long-term capital losses, and any excess of net long-term capital gains over net short-term capital losses in accordance with the timing requirements imposed by the IRC and therefore should not be required to pay any federal income or excise taxes. Distributions of net investment income and net capital gain will be made after the end of each fiscal year. Both types of distributions will be in shares of the Funds unless a shareholder elects to receive cash.

To be treated as a regulated investment company under Subchapter M of the IRC, the Funds must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such securities or currencies, and (b) diversify its holdings so that, at the end of each fiscal quarter, (i) at least 50% of the market value of the Funds' assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of each Fund's assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers which the Funds control and which are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships.

If a Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it will be treated as a corporation for federal income tax purposes. As such, the Funds would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Shareholders of the Funds generally would not be liable for income tax on the Funds' net investment income or net realized capital gains in their individual capacities. Distributions to shareholders, whether from the Funds' net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Funds.

The Funds are subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the IRC. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of the Funds' ordinary income for the calendar year and at least 98.2% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was neither distributed nor taxed to the Funds during the preceding calendar year. Under ordinary circumstances, the Funds expect to time their distributions so as to avoid liability for this tax.

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the IRC.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are generally taxable to shareholders as ordinary income, unless such

distributions are attributable to “qualified dividend income” eligible for the reduced federal income tax rates applicable to long-term capital gains, provided certain holding period and other requirements are satisfied.

Distributions of net capital gain (“capital gain dividends”) generally are taxable to shareholders as long-term capital gain, regardless of the length of time the shares of the Funds have been held by such shareholders.

Certain U.S. shareholders, including individuals and estates and trusts, are subject to an additional 3.8% Medicare tax on all or a portion of their “net investment income,” which should include dividends from the Funds and net gains from the disposition of shares of the Funds. U.S. shareholders are urged to consult their own tax advisers regarding the implications of the additional Medicare tax resulting from an investment in the Funds.

A redemption of the Funds’ shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder’s tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. The gain or loss will generally be treated as long-term capital gain or loss if the shares were held for more than one year and if not held for such period, as short-term capital gain or loss. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of taxable net investment income and net capital gain will be taxable as described above, whether received in additional shares or cash. Shareholders electing to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the NAV of a share on the reinvestment date.

All distributions of taxable net investment income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the IRC, the Funds are required to report to the Internal Revenue Service (“IRS”) all distributions of income and capital gains as well as gross proceeds from the redemption or exchange of the Funds’ shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the IRC, distributions of net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax in the case of non-exempt shareholders who fail to furnish the investment company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if each is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Payments to a shareholder that is either a foreign financial institution (“FFI”) or a non-financial foreign entity (“NFFE”) within the meaning of the Foreign Account Tax Compliance Act (“FATCA”) may be

subject to a generally nonrefundable 30% withholding tax on: (a) income dividends paid by a Fund and (b) certain capital gain distributions and the proceeds arising from the sale of Fund shares paid by a Fund. FATCA withholding tax generally can be avoided: (a) by an FFI, subject to any applicable intergovernmental agreement or other exemption, if it enters into a valid agreement with the IRS to, among other requirements, report required information about certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI and (b) by an NFFE, if it: (i) certifies that it has no substantial U.S. persons as owners or (ii) if it does have such owners, reports information relating to them. The Funds may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of a Fund fails to provide the Funds with appropriate certifications or other documentation concerning its status under FATCA.

Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for the Funds, the Funds' transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to the Funds, defer losses to the Funds, cause adjustments in the holding periods of the Funds' securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, certain of the Funds' hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If the Funds' book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of the Funds' remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If the Funds' book income is less than taxable income, the Funds could be required to make distributions exceeding book income to qualify as a regular investment company that is accorded special tax treatment.

Passive Foreign Investment Companies

Investment by the Funds in certain passive foreign investment companies ("PFICs") could subject the Funds to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making distributions to Fund shareholders. However, the Funds may elect to treat a PFIC as a qualified electing fund ("QEF"), in which case the Funds are required to include its share of the company's income and net capital gains annually, regardless of whether they receives any distribution from the company.

The Funds also may make an election to mark the gains (and to a limited extent losses) in such holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of each Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for the Funds to avoid taxation. Making either of these elections therefore may require the Funds to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Funds' total return.

Foreign Currency Transactions

Each Fund's transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

Other Regulated Investment Companies

Generally, the character of the income or capital gains that the Funds receives from another investment company will pass through to the Funds' shareholders as long as the Funds and the other investment company each qualify as a regulated investment company. However, to the extent that another investment company that qualifies as a regulated investment company realizes net losses on its investments for a given taxable year, the Funds will not be able to recognize their share of those losses until they dispose of shares of such investment company. Moreover, even when the Funds do make such a disposition, a portion of their loss may be recognized as a long-term capital loss, which will not be treated as favorably for federal income tax purposes as an ordinary deduction. In particular, the Funds will not be able to offset any capital losses from its dispositions of shares of other investment companies against its ordinary income. As a result of the foregoing rules, and certain other special rules, it is possible that the amounts of net investment income and net capital gains that the Funds will be required to distribute to shareholders will be greater than such amounts would have been had the Funds invested directly in the securities held by the investment companies in which it invests, rather than investing in shares of the investment companies. For similar reasons, the character of distributions from the Funds (e.g., long-term capital gain, qualified dividend income, etc.) will not necessarily be the same as it would have been had the Funds invested directly in the securities held by the investment companies in which it invests.

Foreign Taxation

Income received by the Funds from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of the Funds' total assets at the close of its taxable year consists of securities of foreign corporations, the Funds may be able to elect to "pass through" to the Funds' shareholders the amount of eligible foreign income and similar taxes paid by the Funds. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends actually received) his or her pro rata share of the foreign taxes paid by the Funds, and may be entitled either to deduct (as an itemized deduction) his or her pro rata share of foreign taxes in computing his or her taxable income or to use it as a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a gain dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder is notified within 60 days after the close of the Funds' taxable year whether the foreign taxes paid by the Funds will "pass through" for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of the Funds' income will flow through to shareholders of the Funds. With respect to the Funds, gains from the sale of securities are treated as derived from U.S.

sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities, receivables and payables are treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by the Funds. The foreign tax credit can be used to offset only 90% of the revised alternative minimum tax imposed on corporations and individuals and foreign taxes generally are not deductible in computing alternative minimum taxable income.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities give rise to income which is required to be distributed and is taxable even though the Funds holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Funds may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount (“OID”) is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Funds in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the “accrued market discount” on such debt security. Market discount generally accrues in equal daily installments. The Funds may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by the Funds may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, the Funds are required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. The Funds may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

If the Funds hold the foregoing kinds of securities, it may be required to pay out as an income distribution each year an amount, which is greater than the total amount of cash interest the Funds actually received. Such distributions may be made from the cash assets of the Funds or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Funds may realize gains or losses from such liquidations. In the event the Funds realize net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of the Funds may be subject to state and local taxes on distributions received from the Funds and on redemptions of the Funds' shares.

A brief explanation of the form and character of the distribution accompany each distribution. After the end of each year, the Funds issue to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisers about the application of federal, state and local and foreign tax law in light of their particular situation.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. The Trust's secretary serves as its Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Funds' Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity and providing a complete and thorough review of all new opening account applications. The Trust does not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Trust may be required to "freeze" the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of a fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Persons controlling a Fund can determine the outcome of any proposal submitted to the shareholders for approval, including changes to the Fund's fundamental policies or the terms of the advisory agreement with the Adviser.

As of October 16, 2023, the following persons owned 5% or more of the respective Fund's outstanding shares per class.

Fund	Shareholder Name and Address	Percentage of Interest	Type of Ownership
Grandeur Peak Emerging Markets Opportunities Fund - Investor Class	Charles Schwab & Co, Inc. San Francisco, CA	38.81%	Record

Management Ownership Information. The Trustees and Officers of the Trust as a group owned less than 1% of any Fund's shares.

MANAGEMENT

The business of the Trust is managed under the direction of the Board in accordance with the Agreement and Declaration of Trust and the Trust's By-laws (the "Governing Documents"), which have been filed with the SEC and are available upon request. The Board consists of four individuals, all of whom are not "interested persons" (as defined under the 1940 Act) of the Trust and the Adviser ("Independent Trustees"). Pursuant to the Governing Documents, the Board shall elect officers including a President, a Secretary, a Treasurer, a Principal Executive Officer and a Principal Accounting Officer. The Board retains the power to conduct, operate and carry on the business of the Trust and has the power to incur and pay any expenses, which, in the opinion of the Board, are necessary or incidental to carry out any of the Trust's purposes. The Board, officers, employees and agents of the Trust, when acting in such capacities, shall not be subject to any personal liability except for his or her own bad faith, willful misfeasance, gross negligence or reckless disregard of his or her duties.

Board Leadership Structure. The Board is led by John V. Palancia, who has served as the Chairman of the Board since inception. The Board has not appointed a Lead Independent Trustee because all Trustees are Independent Trustees. Under the Governing Documents, the Chairman of the Board is responsible for (a) presiding at Board meetings, (b) calling special meetings on an as-needed basis, and (c) execution and administration of Trust policies, including (i) setting the agendas for Board meetings and (ii) providing information to Board members in advance of each Board meeting and between Board meetings. Generally, the Trust believes it best to have a non-executive Chairman of the Board, who together with the President (principal executive officer), are seen by our shareholders, business partners and other stakeholders as providing strong leadership. The Trust believes that its Chairman, the independent chair of the Audit Committee, and, as an entity, the full Board, provide effective leadership that is in the best interests of the Trust, the Funds and each shareholder.

Board Risk Oversight. The Board maintains an Audit Committee with a separate chair. The Board is responsible for overseeing risk management, and the full Board regularly engages in discussions of risk management and receives compliance reports that inform its oversight of risk management from its Chief Compliance Officer at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee considers financial risk and reporting within its area of responsibilities. Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the Chief Compliance Officer is the primary recipient and communicator of such risk-related information.

Trustee Qualifications.

Generally, the Fund believes that each Trustee is competent to serve because of his or her individual overall merits including his or her: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills.

Patricia Luscombe, CFA, has more than 30 years in financial advisory and valuation services. She has delivered a broad range of corporate finance advice including fairness opinions and valuations. Ms.

Luscombe joined Lincoln International in 2007 as a Managing Director and co-head of Lincoln's Valuations & Opinions Group. In this position, she assists regulated investment funds, business development companies, private equity funds and hedge funds in the valuation of illiquid securities for fair value accounting purposes. Ms. Luscombe's clients range from closely held businesses to large, publicly-traded companies. Previously, Ms. Luscombe spent 16 years with Duff & Phelps Corporation, as a Managing Director in the firm's valuation and financial advisory business. Prior to joining Duff & Phelps Corporation, Ms. Luscombe was an Associate at Smith Barney, a division of Citigroup Capital Markets, Inc., where she managed a variety of financial transactions, including mergers and acquisitions, leveraged buyouts, and equity and debt financings. Ms. Luscombe is a member of the Chicago Chapter of the Association for Corporate Growth, the Chartered Financial Analyst Society of Chicago and former president of the Chicago Finance Exchange. Ms. Luscombe holds a Bachelor of Arts degree in economics from Stanford University, a Master's degree in economics from the University of Chicago and a Master of Business Administration degree from the University of Chicago Booth School of Business. In addition, Ms. Luscombe is licensed under the Series 24, 79 and 63 of FINRA.

John V. Palancia has over 40 years of business experience in the financial services industry including serving as the Director of Global Futures Operations for Merrill Lynch, Pierce, Fenner & Smith, Inc. ("Merrill Lynch"). Mr. Palancia possesses an in depth understanding of broker-dealer operations from having served in various management capacities and has held industry registrations in both securities and futures. Based on his service at Merrill Lynch, he also possesses a strong understanding of risk management, balance sheet analysis, compliance and the regulatory framework under which regulated financial entities must operate. Additionally, he is well versed in the regulatory framework under which investment companies must operate based on his service as a member of three other mutual fund boards. This practical and extensive experience in the securities industry provides valuable insight into fund operations and enhances his ability to effectively serve as chairman of the Board. Mr. Palancia is a member of the Investment Company Institute and Mutual Fund Directors Forum. Mr. Palancia holds a Bachelor of Science degree in Economics.

Mark H. Taylor has over 30 years of academic and professional experience in the accounting and auditing fields, which makes him particularly qualified to chair the Board's Audit Committee. Dr. Taylor holds PhD, Master's and Bachelor's degrees in Accountancy and is a licensed Certified Public Accountant and serves as a member of two other mutual fund boards within the Northern Lights Fund Complex. Dr. Taylor is the Director of the Lynn Pippenger School of Accountancy at the Muma College of Business at the University of South Florida and has been serving a three-year term as President of the American Accounting Association (AAA) since August 2022 (as President-Elect 8/22-7/23, President 8/23-8/24, and Past President 8/24-8/25). Dr. Taylor previously served as Vice President-Finance of the AAA, and as President of the Auditing Section of the AAA. He previously served a three-year term on the AICPA's Auditing Standards Board and completed a fellowship in the Professional Practice Group of the Office of the Chief Accountant at the headquarters of the United States Securities Exchange Commission. Dr. Taylor is a member of two research teams that received grants from the Center for Audit Quality and has had his research widely published in leading academic accounting and practice journals. Dr. Taylor has teaching interests in corporate governance and accounting policy as well as auditing and assurance services at the graduate and undergraduate levels and possesses a strong understanding of the regulatory framework under which investment companies operate.

Jeffery D. Young has over 40 years of business management experience, including in the transportation industry and operations and information technologies. He is currently Co-owner and Vice President of the Latin America Agriculture Development Corporation, an agribusiness exporting fruit to the United States and other Central American countries. He has served as Assistant Vice President of Transportation Systems at Union Pacific Railroad Company, where he was responsible for the development and implementation of large-scale command and control systems that support railroad

operations and safety. In this position, Mr. Young was heavily involved in the regulatory compliance of safety and mission critical systems. Mr. Young also served as Chairman of the Association of American Railroads Policy Committee and represented both Union Pacific Railroad and the railroad industry in safety and regulatory hearings with the National Transportation Safety Board and the Federal Railroad Administration in Washington, DC. Mr. Young was a member of the Board of Directors of PS Technologies, a Union Pacific affiliate serving as a technology supplier to the railroad industry. His practical business experience and understanding of regulatory compliance provides a different perspective that brings diversity to Board deliberations.

Trustees and Officers. The Trustees and officers of the Trust, together with information as to their principal business occupations during the past five years and other information, are shown below. Unless otherwise noted, the address of each Trustee and officer is 225 Pictoria Drive, Suite 450, Cincinnati, OH 45246.

Independent Trustees					
Name, Address, Year of Birth	Position(s) Held with Registrant	Length of Service and Term	Principal Occupation(s) During Past 5 Years	Number of Funds Overseen In The Fund Complex*	Other Directorships Held During Past 5 Years**
Patricia Luscombe 1961	Trustee	Since January 2015, Indefinite	Managing Director of the Valuations and Opinions Group, Lincoln International LLC (since August 2007).	10	Northern Lights Fund Trust III (for series not affiliated with the Fund since 2015); Monetta Mutual Funds (since November 2015).
John V. Palancia 1954	Trustee, Chairman	Trustee, since February 2012, Indefinite; Chairman of the Board since May 2014.	Retired (since 2011); formerly, Director of Global Futures Operations Control, Merrill Lynch, Pierce, Fenner & Smith, Inc. (1975-2011).	10	Northern Lights Fund Trust III (for series not affiliated with the Fund since 2012); Northern Lights Fund Trust (since 2011); Northern Lights Variable Trust (since 2011); Alternative Strategies Fund (since 2012).
Mark H. Taylor 1964	Trustee, Chairman of the Audit Committee	Since February 2012, Indefinite	PhD (Accounting), CPA; Professor and Director, Lynn Pippenger School of Accountancy, Muma College of Business, University of South Florida (2019 – present); Professor and Department of Accountancy Chair, Case Western Reserve University (2009-2019); President, American Accounting Association (AAA) commencing August 2022 (President-Elect 2022-2023, President 2023-2024; Past President 2024-2025). AAA Vice President-Finance (2017-2020); President, Auditing Section of the AAA; Member, AICPA Auditing Standards Board (2009-2012); Academic Fellow, Office of the Chief Accountant, United States	10	Northern Lights Fund Trust III (for series not affiliated with the Fund since 2012); Northern Lights Fund Trust (since 2007); Northern Lights Variable Trust (since 2007); Alternative Strategies Fund (since June 2010).

			Securities Exchange Commission (2005-2006); Center for Audit Quality research grants (2014, 2012).		
Jeffery D. Young 1956	Trustee	Since January 2015, Indefinite	Co-owner and Vice President, Latin America Agriculture Development Corp. (since May 2015); President, Celeritas Rail Consulting (since June 2014); Asst. Vice President - Transportation Systems, Union Pacific Railroad Company (June 1976 to April 2014).	10	Northern Lights Fund Trust III (for series not affiliated with the Fund since 2015).

* As of September 1, 2023, the Trust was comprised solely of the 10 active portfolios managed by the Adviser.

** Only includes directorships held within the past 5 years in a company with a class of securities registered pursuant to Section 12 of the Securities Exchange Act of 1934 or subject to the requirements of Section 15(d) of the Securities Exchange Act of 1934, or any company registered as an investment company under the 1940 Act.

Officers of the Trust

Name, Address, Year of Birth	Position(s) Held with Registrant	Length of Service and Term	Principal Occupation(s) During Past 5 Years
Brian Curley 1970	President	Since May 2023, indefinite	Vice President, Ultimus Fund Solutions, LLC (since 2020); Vice President, Gemini Fund Services, LLC (2015-2020).
Timothy Burdick 1986	Vice President	Since May 2023, indefinite	Vice President and Senior Managing Counsel, Ultimus Fund Solutions, LLC (2023 – present); Vice President and Managing Counsel, Ultimus Fund Solutions, LLC (2022 – 2023); Assistant Vice President and Counsel, Ultimus Fund Solutions, LLC (2019 – 2022).
Richard Gleason 1977	Treasurer	Since May 2023, indefinite	Assistant Vice President, Ultimus Fund Solutions, LLC (since 2020); Assistant Vice President, Gemini Fund Services, LLC (2015-2020).
Viktoriya Pallino 1995	Secretary	Since August 2022, indefinite	Senior Legal Administrator, Ultimus Fund Solutions, LLC (since 2023); Legal Administrator II, Ultimus Fund Solutions, LLC (2021-2023); Legal Administrator I, Ultimus Fund Solutions, LLC (2019-2021); Legal Administration Associate, Gemini Fund Services, LLC (2017-2019).
William Kimme 1962	Chief Compliance Officer	Since February 2012, indefinite	Senior Compliance Officer of Northern Lights Compliance Services, LLC (since 2011).

Audit Committee. The Board has an Audit Committee that consists solely of Trustees who are not “interested persons” of the Trust within the meaning of the 1940 Act. The Audit Committee’s responsibilities include: (i) recommending to the Board the selection, retention or termination of the Trust’s independent auditors; (ii) reviewing with the independent auditors the scope, performance and anticipated cost of their audit; (iii) discussing with the independent auditors certain matters relating to the Trust’s financial statements, including any adjustment to such financial statements recommended by such independent auditors, or any other results of any audit; (iv) reviewing on a periodic basis a formal written statement from the independent auditors with respect to their independence, discussing with the independent auditors any relationships or services disclosed in the statement that may impact the objectivity and independence of the Trust’s independent auditors and recommending that the Board take appropriate action in response thereto to satisfy itself of the auditor’s independence; and (v) considering the comments of the independent auditors and management’s responses thereto with

respect to the quality and adequacy of the Trust’s accounting and financial reporting policies and practices and internal controls. The Audit Committee operates pursuant to an Audit Committee Charter. Dr. Taylor is Chairman of the Audit Committee.

Compensation of Directors. Each Trustee who is not affiliated with the Trust or an investment adviser to any series of the Trust receives a fee of \$35,000 per year, allocated among each of the various portfolios comprising the Trust, as well as reimbursement for any reasonable expenses incurred. In addition to the annual fees and reimbursements, the Chairman of the Board receives a fee of \$8,400 per year, and the Audit Committee Chairman receives a fee of \$6,000 per year, in each case paid in quarterly installments.

None of the executive officers receive compensation from the Trust.

Both the Funds and the Trust are new and thus information about the compensation paid to the Trustees by the Trust for its most recent fiscal year is not available.

Board’s Ownership of Shares in the Fund. As of December 31, 2022, the Board beneficially owned the following amounts in the Funds:

Name of Trustee	Dollar Range of Equity Securities in the Funds	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies
Patricia Luscombe	None	None
John V. Palancia	None	None
Mark H. Taylor	None	None
Jeffery D. Young	None	None

FINANCIAL STATEMENTS

Each of the Funds is a continuation of the corresponding Predecessor Fund. The financial statements and financial highlights in the April 30, 2023 Annual Report (the “Annual Report”) of each Predecessor Fund are incorporated in this SAI by reference. The financial statements and financial highlights of the Predecessor Funds in the Annual Report have been audited by Deloitte & Touche LLP, whose report thereon appears in the Annual Report.

You can obtain a copy of the financial statements contained in the Funds’ Annual or Semi-Annual reports without charge by contacting the Fund at the address or number on the front page of this SAI.

APPENDIX A BOND RATINGS

Standard & Poor's Ratings Group—A brief description of the applicable Standard & Poor's ("S&P") rating symbols and their meanings (as published by S&P) follows:

Long-Term Issue Credit Ratings

AAA An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA An obligation rated 'AA' differs from the highest rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Obligations rated 'BB', 'B', 'CCC', 'CC' and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C A 'C' rating is assigned to obligations that are currently highly vulnerable to nonpayment, obligations that have payment arrearages allowed by the terms of the documents, or obligations of an issuer that is the subject of a bankruptcy petition or similar action which have not experienced a payment default. Among others, the 'C' rating may be assigned to subordinated debt, preferred stock or other obligations on which cash payments have been suspended in accordance with the instrument's terms or when preferred stock is the subject of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

D An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation, including a regulatory capital instrument, are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking

of similar action if payments on an obligation are jeopardized. An obligation's rating is lowered to 'D' upon completion of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

Plus (+) or Minus (-): The ratings from 'AA' to 'CCC' may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

NR This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

Short-Term Issue Credit Ratings

A-1 A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2 A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3 A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B A short-term obligation rated 'B' is regarded as having significant speculative characteristics. Ratings of 'B-1', 'B-2', and 'B-3' may be assigned to indicate finer distinctions within the 'B' category. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B-1 A short-term obligation rated 'B-1' is regarded as having significant speculative characteristics, but the obligor has a relatively stronger capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

B-2 A short-term obligation rated 'B-2' is regarded as having significant speculative characteristics, and the obligor has an average speculative-grade capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

B-3 A short-term obligation rated 'B-3' is regarded as having significant speculative characteristics, and the obligor has a relatively weaker capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

C A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D A short-term obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation including a regulatory capital instrument, are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Moody's Investors Service, Inc.—A brief description of the applicable Moody's Investors Service, Inc. ("Moody's") rating symbols and their meanings (as published by Moody's) follows:

Long-Term Obligation Ratings

Aaa Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.

Aa Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Baa Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess certain speculative characteristics.

Ba Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.

B Obligations rated B are considered speculative and are subject to high credit risk.

Caa Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.

Ca Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C Obligations rated C are the lowest rated class and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Short-Term Obligation Ratings

P-1 Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2 Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3 Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

NP Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Note: Canadian issuers rated P-1 or P-2 have their short-term ratings enhanced by the senior-most long-term rating of the issuer, its guarantor or support-provider.

APPENDIX B- PROXY VOTING POLICY

GRANDEUR PEAK GLOBAL ADVISORS, LLC

Regulatory Background - Proxy Voting Provisions of the Investment Advisers Act

Rule 206(4)-6 of the Investment Advisers Act of 1940 requires that, for an investment adviser to exercise voting authority with respect to client securities, the adviser must:

- Adopt and implement written policies and procedures that are reasonably designed to ensure that the adviser votes client securities in the best interest of clients, which procedures must include how the adviser addresses material conflicts that may arise between the adviser's interests and those of the adviser's clients;
- Disclose to clients how they may obtain information from the adviser about how the adviser voted with respect to their securities; and
- Describe to clients the adviser's proxy voting policies and procedures and, upon request, furnish a copy of the policies and procedures to the requesting client.

In accordance with our obligations under the Rule, the Firm has adopted and implemented the following Proxy Voting Policy to ensure that client proxies are voted in the best interest of clients at all times.

I. POLICY OVERVIEW

A means by which the Firm fulfills its fiduciary responsibility is by exercising proxy voting rights. Corporate governance, including but not limited to, compensation plans, corporate actions and the composition of a board of directors, can have a significant influence upon the behavior of a management team and the value of a corporation. The proxy voting process is the primary means by which investors are able to influence such activities. As such, the Firm considers how we vote proxies to be a meaningful activity.

One fundamental tenet of the Firm's investment philosophy is to invest in companies with high quality management teams. We spend a significant amount of time evaluating the performance, behavior, and actions of company executives in order to gain an understanding of how they think about protecting and increasing shareholder value. As a result of being invested with high quality management teams, the Firm generally supports the recommendations of the boards of directors when voting proxies. However, we ultimately vote for or against recommendations based on the fundamental premise that at all times we are attempting to maximize the value of our investments for the benefit of our clients, with a bias towards long-term value over short-term value.

The Firm has developed the following general proxy voting guidelines to assist us in making decisions about how to vote proposals concerning certain issues. These guidelines are not exhaustive, as the variety of issues on which shareholders may be asked to vote is unlimited. The disclosure of these guidelines is intended to provide clients with a better understanding of how the Firm attempts to maximize shareholder value via the proxy voting process.

II. GENERAL GUIDELINES

Board of Directors

The Firm considers the board of directors to be an important component of strong corporate governance. The board is responsible for overseeing the management team of a company and helping to ensure that it acts in the best interest of shareholders. The primary means by which the Firm can influence the board of directors is to vote for the election of directors who have relevant and valuable

experience that will enhance the management of the company. Further, the Firm prefers that a board of directors have a majority of independent directors because we believe that a board with such a composition is generally a strong advocate for shareholders.

However, while we endorse proposals that support the creation of boards with a majority of independent directors, as well as proposals which call for the audit, compensation and nominating committees to be comprised solely of independent directors, the failure of the company to nominate only independent directors, or to have only independent directors serve on key committees, may not cause us to vote against the election of a director who lacks independence. The Firm appreciates the importance of these standards but we do not believe it is always in the best interest of shareholders to blindly vote against all directors who may not be considered independent. For example, a large shareholder who serves as a director is not considered independent but may be a very important advocate for investors since his interests are closely aligned with those of shareholders.

Executive Compensation

The Firm supports compensation plans which are designed to align the interests of management and shareholders as well as relate executive compensation to the performance of the company. To evaluate compensation plans, we may use quantitative criteria that measure the total cost to shareholders if a plan is passed.

Capital Structure

The Firm may be asked to vote on proposals pertaining to changes in the capital structure of a company. Such proposals include, but are not limited to, common stock authorizations, capital issuance requests, share repurchase programs, stock splits, and debt restructurings. We will vote for board-recommended capital structure changes so long as the proposals are well aligned with shareholder interests.

Mergers, Acquisitions and Other Transactions

Companies may undertake a variety of strategic transactions aimed at enhancing shareholder value including mergers, acquisitions, recapitalizations, spin-offs, asset sales, and liquidations. In evaluating proposed transactions, we will consider the benefits and costs to shareholders over both the short and long term. Specific items we will consider include the financial impact of the transaction on future operating results, the increase or decrease in shareholder value, and any changes in corporate governance and their impact on shareholder rights. When shareholders are asked to vote on mergers, acquisitions and other similar proposals, they are considered to be material to the company and could require the analysis of a wide variety of factors in order to determine if the transaction is in the best interest of shareholders. As a result, the Firm will review and vote each proposal on a case-by-case basis.

Anti-Takeover Provisions

In an attempt to prevent a company from being acquired without the approval of the board of directors, shareholders may be asked to vote on a variety of proposals such as shareholder rights plans (commonly referred to as “poison pills”), supermajority voting, blank check preferred stock, fair price provisions, and the creation of a separate class of stock with disparate voting rights. The Firm recognizes that such proposals may enhance shareholder value in certain situations. However, the Firm will review proposals pertaining to anti-takeover provisions on a case-by-case basis and may vote against such proposals that the Firm perceives as merely intended to entrench management and prevent the company from being acquired at a fair price.

Auditors

An audit of a company’s financial statements is an important part of the investment process, for while an audit cannot fully protect investors against fraud, it does verify that the financial statements

accurately represent the position and performance of the company. The Firm generally votes for proposals to ratify auditors unless the auditors do not appear to be independent. Auditor independence may be compromised if the auditor has a financial interest and/or association with the company or receives substantial compensation for non-audit related services. The Firm also generally votes for proposals to authorize the board of directors to determine the remuneration of the auditors unless there is evidence of excessive compensation relative to the size and nature of the company.

Social and Environmental Issues

The Firm believes corporations have an obligation to be responsible corporate members of society, and we will support proposals concerning social, political or environmental issues if we believe the proposals are in the best interest of shareholders.

III. EXCLUSIONS AND EXCEPTIONS

The Firm has developed the general guidelines to assist us in making decisions about how to vote proposals concerning anticipatable issues. However, we recognize that the general guidelines are not exhaustive and cannot anticipate all of the potential issues, or the facts and circumstances surrounding a particular vote. Although we have general guidelines, the Firm may supplement or deviate from these guidelines in the situations outlined below.

Case-by-case Issues

Several of the issues mentioned above in the general guidelines recognize that the proper vote to maximize shareholder value will be dependent upon the facts in the actual situation. These facts cannot be anticipated and will be reviewed on a case-by-case basis with the aim of maximizing shareholder value. In addition, any issues that are not addressed by the foregoing guidelines will be reviewed on a case-by-case basis.

Exceptions

From time to time the Firm will review an issue that is addressed by the foregoing guidelines and determine that in the specific case it is appropriate to vote against the recommendation provided in the guidelines with the aim of maximizing shareholder value. At these times it is permissible for the Firm to vote against the general guidelines, but it is required that the rationale behind the deviation from the guidelines is sufficiently documented.

Foreign Issuers

With respect to some non-U.S. issuers, the exercise of voting rights can cause an account to incur a cost or cause the underlying shares to be blocked from trading. Although we recognize the importance of the right to vote, the Firm believes that clients may be better served by avoiding unnecessary costs and preserving the right to trade shares promptly should conditions warrant. Accordingly, there may be times when no vote is cast because the Firm's analysis of a particular proxy leads us to believe that the cost of voting the proxy exceeds the expected benefit to clients.

Conflicts of Interest

The Firm will at all times make its best effort to vote proxies in the best interest of clients and avoid material conflicts of interest. A material conflict of interest refers to a situation in which the Firm or affiliated persons of the Firm have a financial interest in a matter presented by a proxy which could potentially compromise the Firm's independence of judgment and action with respect to the voting of the proxy. We will attempt to identify any material conflicts that may exist by, among other things, reviewing the identity of each issuer soliciting proxy votes to determine if the issuer or an affiliate of the issuer (i) is a client of the Firm, (ii) has a relationship with the Firm, (iii) there is a reasonable expectation that the issuer or an affiliate would become a client of the Firm or develop a material relationship with

the Firm, or (iv) the Firm holds a significant amount¹ of the issuer's shares outstanding. In addition, any employee with knowledge of a personal conflict of interest (e.g., a familial relationship with company management) relating to an issuer soliciting proxy votes must disclose that conflict to the Proxy Manager and Compliance and remove himself or herself from the proxy voting process for that issuer. Any questions regarding whether a particular issue may present a material conflict of interest with respect to the Firm's voting of client proxies should be directed to Compliance.

In the event that the Firm has a material conflict of interest in any proposal that is the subject of a proxy to be voted for a client account, the Firm will not vote on that proposal. Proposals on the same proxy ballot for which the Firm does not have a material conflict of interest will be voted in accordance with the Firm's Proxy Voting Policy.

IV. PROCEDURES

Proxy Manager's Role

The Firm has hired ISS to serve as its Proxy Manager, to assist in coordinating and voting securities. The Proxy Manager keeps track of upcoming shareholder meetings and vote deadline information, generates vote recommendations, coordinates with custodian banks to ensure votes are executed, maintains voting records, and serves as a general resource for proxy matters.

Research Team's Role

The Proxy Committee has assigned proxy voting processing to the Sustainability Analyst, with support from Operations. The Sustainability Analyst will process proxy votes, coordinate with the Research Team for input on individual voting items where the Proxy Manager's recommendation is inconsistent with (or there exists an exception to) the Firm's Proxy Voting Policy, and endeavor to document any instances where a proxy vote is against the voting policy.

Members of the Firm's Research Team are responsible for reviewing the proxies raised to them by the Sustainability Analyst of the companies for which they serve as an analyst and providing vote recommendations and rationale that conform with this Policy.

Operations Team's Role

The Proxy Committee has designated a person within Operations to support the Sustainability Analyst in ensuring votes are cast, coordinating with the Research Team and Proxy Manager, and monitoring the Firm's proxy voting procedures.

Proxy Committee

The Firm has established a Proxy Committee to oversee the implementation and monitoring of this Policy. No less than annually, the Proxy Committee shall:

- Review a sample of the record of voting delegation, including ERISA accounts, maintained by the Proxy Manager to determine if the Firm is exercising its authority to vote proxies on portfolio securities held in the selected accounts;
- Request and review voting data to determine if accurate and timely communication of proxy votes is reasonably accomplished during the period reviewed;

¹ The Firm's relative level of ownership of certain issuer's soliciting proxy votes, as a percent of the company's shares outstanding, may give the appearance of control. The Firm's clients hold the issuer's stock solely for investment purposes, with no intent to control the business or affairs of the issuer. In such instances, the Firm may elect not to vote.

- Meet with the Proxy Manager to review the voting of proxies, communication of proxy votes, and the general functioning of this policy; and
- Review any of the Proxy Manager's changes to business practices and/or policies and procedures to confirm there are no conflicts of interest.
- Share proxy votes with the mutual fund Board of Trustees for their review and process oversight.

V. RECORDKEEPING, TRAINING, AND MAINTENANCE

Recordkeeping

Under rule 204-2, the Firm must retain the following:

- a) proxy voting policies;
- b) proxy statements received regarding client securities;
- c) records of votes they cast on behalf of clients;
- d) any documents prepared by the Firm that were material to making a decision how to vote, or that memorialized the basis for the decision – this will generally be the proxy policy and documentation regarding any votes cast contrary to the policy;
- e) record of the voting resolution of any conflict of interest;
- f) records of any client requests for information on how a client's proxies were voted and records of the Firm's responses to client requests;
- g) all written reports arising from annual reviews of the policy.

The Firm may also use the Securities and Exchange Commission's EDGAR database for the items referred to in item c above. Records shall be maintained by the Firm for a period of not less than five years from the end of the Firm's fiscal year during which the last entry was made on the record.

Training

At least annually, appropriate personnel will be trained regarding the Proxy Voting Policy. Such training program may review applicable laws, regulations, procedures and recent trends in proxy voting and their relation to the Firm's business.

Annual Certification

Each employee involved in the proxy voting process is required to certify annually that he/she has read, understands and has complied with, to the best of his/her knowledge, the Firm's Proxy Voting Policy.

ERISA

The Firm acknowledges our responsibility to vote proxies for ERISA clients in a manner that ensures the exclusive benefit for the underlying participants and beneficiaries. The Firm casts such proxy votes for the sole purpose of extending benefits to participants and beneficiaries while using the care, skill and diligence that a prudent person acting in a like capacity and familiar with such matters would use under the circumstances then prevailing.

Undue Influence

Any attempts by any of the Firm's personnel to influence the voting of client proxies in a manner that is inconsistent with the Firm's Policy should be reported to the CCO. If the CCO is the person attempting to influence the voting, the report should be made to the Firm's CEO.

VI. DISCLOSURE TO CLIENTS

Interested Clients are encouraged to request information on how the Firm has voted their proxies. In order to request this information, clients should contact their Client Relations representative. The proxy

voting record of the Firm's mutual funds is available on the SEC's website at www.sec.gov.

As of January 20, 2023
